

Gp 9v lithium battery

What is a GP lithium 9V battery?

GP Lithium 9V battery is an all-rounded battery with supreme performance you will need to power essential devices from infrared thermometers to walkie talkies. The advanced power technology allows the GP Lithium batteries to last longer than any average alkaline batteries, and supply devices with stable power to operate.

Are GP lithium batteries good?

The Lithium batteries operate reliably and discharge with exceptional energy-efficient performance even under the extremes of cold and hot from -40°C to $+60^{\circ}\text{C}$. Like a dependable friend, it is the power source that you can rely on through the ups and the downs. What does not age? Your GP lithium battery.

What is a GP Primary lithium coin battery?

Cameras (conventional/digital/instant) GP Primary Lithium Coin Batteries supply power with high energy density and reliability that works for a variety of applications. Despite their small size, these lithium coin batteries possess high energy density. They are especially suitable for compact devices with extra low background drains.

The GP Lithium 9V battery is the best choice of battery for user replaceable electronic devices. It can provide 5 times longer lasting power than an ordinary alkaline battery and a 10-year service life in ionization type smoke detectors.

GP lithium replacement batteries are available in popular AA, AAA and 9V or E-BLOCK sizes, in addition to a selection of specialist lithium products. Particularly well suited to devices that need occasional bursts of relatively high current, including hair trimmers, high-tech flashlights and audio players, other typical uses are PIR security ...
