Greenway Energy (GWE) develops technologies to address challenges relating to fuel cells and hydrogen production, delivery, and storage. Our goal is to find solutions through applied research and development of hydrogen and fuel cell technologies that will have a positive effect on the economy and successfully impact emerging markets in the future.

GE expects the spinoff of its energy, power and digital services operations to be complete by early 2024, with the health care unit to be split off in early 2023. Dive Insight:

Create your own laundry space in a closet, kitchen, or anywhere you have a 120V outlet and water hookup. It's an all-in-one unit, so it takes up less space while saving you time and energy. Just load your clothes and remove them when they're clean and dry. Watch the One and Done Experience Video

GE Vernova, GE's energy unit, will go public in April. GE, which was built into a conglomerate over decades, sought the split to unlock the value of its three core businesses, including health ...
