If a company's variable costs are higher than its fixed costs, the company is using less operating leverage. How a business makes sales is also a factor in how much leverage it employs. A firm with few sales and high margins is highly leveraged. On the other hand, a firm with a high volume of sales and lower margins are less leveraged.

An issue facing United States residential solar is that rising interest rates have driven up financing costs, discouraging customers and exposing highly leveraged businesses and fly-by-night operators. Many companies offer solar lease arrangements, enabling customers to avoid heavy upfront costs.

What should highly leveraged companies be doing now? Most of the troubled companies we work with became highly leveraged as a result of consistent multi- year losses that resulted in a declining equity base. This string of losses reduced the company's equity and made a once reasonable debt level, highly leveraged.
