Check the orientation, size, pitch, and shading of your roof. The ideal roof for a residential solar system has 500 sq ft (46 m²) of unobstructed, south-facing, unshaded space, sloped at a 30-degree pitch. Your roof likely doesn't meet this ideal, but that doesn't mean it's unsuitable for solar. East- or west-facing roof areas are okay, so long as they're not shaded by ...
