

Why Do Solar Companies Need Learning & Development People? ... Thank you, Claire, for sharing your story and your ideas with us and the HeatSpring community! *Footnote: The source for the projection of 900,000 new solar jobs by 2035 is the National Renewable Energy Laboratory's (NREL) 2021 Annual Technology Baseline (ATB) report. ...

Here are a few additional reasons why solar companies may fail: Market Competition: The solar industry is highly competitive, and the number of solar companies has increased significantly ...

Homeowners who produce solar energy on their property can generate solar renewable energy certificates (often called SRECs or RECs) based on the amount of clean energy their solar panels generate. These SRECs can then be sold to companies or utilities looking to offset their own carbon emissions or to meet renewable energy targets.

Larger construction or solar EPC companies that are competing against smaller solar firms use their size as an advantage during the sales process by offering better payment terms to the client. For example, payment terms from a large solar EPC contractor might look like this: \$10,000 deposit; 100% payment when the project is completed.

It was a little daunting and I went in thinking I was going to leave there and form a women's solar company. Then pretty quickly realized that that was not the case. It was going to be a lot harder than that. And that I didn't actually have the experience I really needed on the install side. After that, I worked for a solar thermal installer.

They may also work for utilities, manufacturers, distributors, or software companies. They are start-ups formed to support the urgent need to transform our energy sector and decades and older companies from the electrical or other infrastructure sectors who have expanded their business model to include solar. HeatSpring Teams are everywhere.

Based in Durango, Colorado, Shaw Solar can be described as a big fish in a small pond. Opening their doors back in 2006, they initially worked on residential and small commercial solar thermal and PV and some lead-acid battery storage.... Life-and business-are all about meeting the needs of other people, says Keith Cronin, founder of SunHedge, based in Kailua, Hawaii and instructor for Heatspring's Solar Executive MBA Training. If you focus on this simply philosophy, you'll make friends in your community, become an educator and give your solar business

a boost, he says.

That's why it's the focus of our newest free course on HeatSpring - Rural Energy for America Program (REAP) for Solar Companies. While the program was first created in 2002 as a part of the federal Farm Bill as a program of the United States Department of Agriculture's Office of Rural Development, it has been getting a lot of fresh ...

Why don't solar companies do this? Well, some do. Usually the big companies. It is part of why they became big companies. They understand the marketplace and the buying habits of humans. You want to be a household name, before someone needs your services. You want to be in their minds and in the mind of the community, way before they are ...

For solar, not so much. Why? Solar businesses in general are contracting companies. Sure, some have sophisticated sales and marketing arms. Yes, some offer creative financing. But when you distill it down to its basic ...

The solar energy industry continues to grow, and utility-scale solar projects are at the leading edge. In their Market Insight Report, the Solar Energy Industries Association (SEIA) notes that the utility-scale segment continues to have record-breaking quarterly installations, with 9.8 ...

In this conversation, we hear from HeatSpring Solar Construction Safety instructor Tripper Gawan as he emphasizes that a true safety culture is about more than just reading manuals and following rules - it's about creating an environment where employees feel empowered to take ownership of their own experience. A vibrant, energetic safety ...

Solar Systems Can Lower Peaks in Warm Climates. If a company has a solar system and uses a lot of electricity for air conditioning-which is generally needed during the day-the solar will lower the peak demand. Because solar energy is largely generated between 10 am and 3 pm, the solar will "shave the peak," says Lord.

Solar on landfills is seeing a major boost in many places across the country. States like Maryland, New Jersey, and New York, are encouraging or incentivizing the repurposing of closed landfills, also known as brownfields, to generate clean, renewable energy while minimizing the environmental impact of these often otherwise unusable sites.

Homeowners who produce solar energy on their property can generate solar renewable energy certificates (often called SRECs or RECs) based on the amount of clean energy their solar panels generate. These ...

Best Practices in Solar O& M. Investing in Training and Education: One of the most valuable investments a solar company can make is in the training and education of its O& M team. Ensuring that technicians are well-versed in the latest industry standards and technologies can enhance the overall efficiency and reliability

of their solar plants.

LiOn batteries have a much narrower voltage charge window. While, in 12Vdc terms, LA batteries can have a charge window ranging from 10.5 to 15.9 LiOn batteries may only have a window between 11.9 and 13.9. The window varies between manufacturers and is critical for proper operation.

Amazingly, the savings are greater than the lost revenue. For a typical utility or supplier, the net savings, according to my calculations, are \$25 per customer per year. This is ...

Opening their doors back in 2006, they initially worked on residential and small commercial solar thermal and PV and some lead-acid battery storage. ... Continue reading "Meeting the Demands of the Solar Plus Era: Why Shaw Solar is Launching their Distributed Energy Resources (DER) Electrical Apprenticeship Program"

The United States had 73.5 GW of utility scale solar capacity as of January 2023, according to the Energy Information Administration (EIA). If everything continues as planned, it will be the first year that more than half of the U.S.... Continue reading "Celebrating Top Solar Companies: A Conversation with Arevon "

What are examples of small solar companies that are marketing as well as the big guys? My poster child for a small solar company that takes advantage of a small marketing budget is a company that I know in the L.A. area. They have videos, but they also have a very active blog, Facebook, and Twitter presence.

Some solar companies have begun hosting online events to do what used to be done in person. Trend: Electronics are getting cheaper and more powerful. ... HeatSpring co-founder. You can reach me directly at bhayden @ heatspring or 800-393-2044 x1. More posts by Brian. Related posts.

Education Pathway - Take a training course with a NABCEP Associate Registered Training Provider like HeatSpring's Solar PV Boot ... Candidates will submit a Verification of Work Experience Form directly to NABCEP along with a letter on company letterhead from their employer which describes their job duties and their length of employment ...

HeatSpring for Teams; Our Company; What's Winning Online Solar Sales? Brit Heller When it comes to the online solar buying landscape, the team at EnergySage is well positioned as a thought leader. Founded in 2009, EnergySage was created to educate homeowners about solar and the solar purchasing process. Back in 2012/13, they launched the ...

The course is taught by two instructors: Keith Cronin, who built and sold his solar installation business to SunEdison in 2007, and Christopher Lord, a lawyer specializing in finance who works with solar companies to find viable projects and investors for those projects. Graduates from the Solar Executive MBA course will learn:

At the very least, we need to template out what we do every day. We need to have a clearly defined system for consistent execution. This is where the money is made (and lost). The companies that can do this consistently will make the most money, have the most engaged team members, and have more satisfied clients.
