What does IBC Solar do?

IBC SOLAR is a provider of photovoltaic and energy storage solutions and services. It offers solar modules, inverters, storage, and mounting systems, etc. The company also offers consulting, planning, delivery, mounting, and maintenance services. IBC SOLAR has 4 employees across 13 locations and EUR693.56 m in annual revenue in FY 2023.

How strong is IBC Solar?

Strong in the market. Our three market segments. To date, IBC SOLAR has implemented photovoltaic systems with an output of more than seven gigawatts worldwide. That's the equivalent of several coal and nuclear power plants. Our portfolio comprises solar energy solutions in the three market segments Home, Business and Solar Parks.

How many distributors does IBC Solar have?

Their distribution network for solar products covers over 1000 distributors and wholesalers across over 30 different countries. IBC Solar markets modules and components of renowned manufacturers [who?] and also distributes its own product line through domestic retail partners.

How many gigawatts does IBC Solar produce?

IBC SOLAR has implemented photovoltaic systems worldwide, with an output of 6 gigawatts to date. The range includes energy solutions for solar parks, which feed electricity into the grid, and self-consumption systems for business owners and private households to off-grid photovoltaic systems and local storage systems.

Solar systems are disconnected from the public grid in the event of a power failure. Thanks to the optional emergency power function of your battery storage system, your company is protected in the event of a power failure and continues to be supplied with electricity. Unimportant energy consumers switch themselves off.
