So, I celebrate this first International Day of Clean Energy; I applaud the work of the International Renewable Energy Agency; And I welcome the call made by countries at COP28 to triple renewable energy capacity by 2030. It is my firm belief that fossil fuel phase out is not only necessary, it is inevitable.

The International Renewable Energy Agency (IRENA) produces comprehensive, reliable datasets on renewable energy capacity and use worldwide. Renewable energy statistics 2024 provides datasets on power-generation capacity for 2014-2023, actual power generation for 2014-2022 and renewable energy balances for over 150 countries and areas for 2021-2022. ...

The United Nations General Assembly (UNGA) has adopted a resolution proclaiming the 26th January as the International Day of Clean Energy, the anniversary day of the founding of the International Renewable Energy ...

Fossil-fuel subsidies are one of the biggest financial barriers hampering the world's shift to renewable energy. The International Monetary Fund ... That's roughly \$11 billion a day.

Solar energy can only be captured during the day, and ideally in cloudless conditions. ... The International Renewable Energy Agency (IRENA) stated that ~86% (187 GW) of renewable capacity added in 2022 had lower costs than electricity generated from fossil fuels. [166]

EERE's applied research, development, and demonstration activities aim to make renewable energy cost-competitive with traditional sources of energy. Learn more about EERE's work in geothermal, solar, wind, and water power.

The eleventh edition of IRENA's Renewable energy and jobs: Annual review - the fourth consecutive report produced in collaboration with the International Labour Organization (ILO) - provides the latest data and estimates of renewable energy employment globally.

# International renewable energy day

It was established with the main aim of promoting the widespread adoption and sustainable use of renewable energy worldwide in 2009, with IRENA celebrating 15 years since its foundation on 26th January of this year. Its 15th anniversary coincides with the first annual International Day of Clean Energy as declared by the General Assembly. It was ...

That is all while saving money and saving the planet. A fair, just, equitable, and urgent transition from dirty fossil fuels to clean energy is essential to avoid the worst of climate chaos and spur sustainable development. So, I celebrate this first International Day of Clean Energy; I applaud the work of the International Renewable Energy Agency; And I welcome the ...

New York, 26 January 2024 -- Informing and engaging citizens and leaders worldwide for a just, inclusive, and equitable energy transition based on renewables and energy efficiency, will be ...

The world is on course to add more renewable capacity in the next five years than has been installed since the first commercial renewable energy power plant was built more than 100 years ago. In the main case forecast in this report, almost 3 700 GW of new renewable capacity comes online over the 2023-2028 period, driven by supportive ...

On January 26, the United Nations marks its very first International Day of Clean Energy, representing a significant milestone in our collective commitment to a sustainable future. ... With a dedicated focus on advocating for clean and renewable energy sources, this occasion serves as a unifying platform for governments, businesses, and ...

The United Nations General Assembly declared the International Day of Clean Energy in August last year to raise awareness and spur action for a fair and comprehensive shift to clean energy for the betterment of humanity and the environment. 26 January also marks the establishment of the International Renewable Energy Agency (IRENA).

Kelly Speakes-Backman, Acting Assistant Secretary for Energy Efficiency and Renewable Energy, shared that International Women's Day gives her hope for her girls. "I have 16-yr-old twins who are looking to go into their own careers, and it's not as if they feel the pressure to move into specific careers because they're "made for women ...

So, I celebrate this first International Day of Clean Energy; I applaud the work of the International Renewable Energy Agency; And I welcome the call made by countries at COP28 to triple renewable ...

The International Renewable Energy Days"2024, Focus on Wind Energy Event hosted by Centre de Développement des Energies Renouvelables- CDER May 28, 2024 - May 30, 2024 Alger, 16000 Algiers ...

# International renewable energy day

Renewables on the rise For the 760 million people in the world who lack access to electricity, the introduction of modern clean energy solutions can enable vital services such as improved healthcare, better education, and internet access, thus creating new jobs, improving livelihoods, and reducing poverty. Driven by the global energy crisis and policy momentum, renewable ...

The International Renewable Energy Agency (IRENA) ... about \$8 billion a day. Switching to clean sources of energy, such as wind and solar, thus helps address not only climate change but also air ...

Sustainable Energy Days are events held globally to promote clean energy and energy efficiency. In the current context of the energy transition and independence of the energy supply, every Sustainable Energy Day is an opportunity to inspire behavioural changes and innovation towards meeting energy and climate goals in the EU and around the world.

International Renewable Energy Agency (IRENA) in cooperation with the Ministry of Energy and Mineral Resources has embarked on producing a Renewable Readiness Assessment, coupled with the IRENA Flexibility analyses. ... This two-day multi-stakeholder meeting gathered national stakeholders representing the Ministry of Energy and Mineral ...

The event increased awareness of the role of clean energy in expanding universal access to energy and promoted global initiatives aimed towards achieving the goals set out in ...
