Solar Aircraft Company's work in the jet engine field convinced the company's president, Edmund Price, that the turbine would be the main prime mover in the future

Two important parts of this are; being proud of what you do, and feeling as if your work contributes to the greater good. When you work in the solar energy field, the work that you do contributes to overall improvements to the environment including reducing pollution and beating back climate change. This helps both humans and animals as well.

## Is solar turbines a good company to work for

The company is very traditional in the sense that no one was younger than 25 years old. A lot of the people in the company have been there for 10+ years and you could tell they weren't interested in bringing new ideas to the company. Also, men dominate this field clearly. A lot of the people at the company were men and not a lot of women.
