

Is tesla solar panels worth it

Is Tesla a good solar company?

Tesla offers low-profile solar panels, which are likely cheaper than those from other national companies. Those guaranteed low prices, matched with quality panels, batteries and inverters mean Tesla likely offers more solar power for less money than other national players. Tesla customers might lose some of that value in customer service.

Are Tesla Solar panels worth it?

Tesla solar panels are a worthwhile consideration, as they offer solid efficiency ratings, a decent warranty, and aesthetically pleasing designs at an excellent value. However, the answer to this question will ultimately hinge on your personal preferences, budget, and energy needs.

Does Tesla sell solar panels?

Tesla sells solar panels for much less than other installation companies because it doesn't have to worry about customer acquisition costs and often subcontracts out the actual installations. Despite the vibe that the Tesla brand gives off, its solar panels are pretty average.

How much do Tesla Solar panels cost?

Tesla solar panels cost about \$2.50 per watt before incentives. That works out to \$15,000 for an average-sized solar installation. The actual installation cost will vary depending on how many solar panels you need if it's installed by Tesla or a Certified Installer, and the complexity of your roof.

Are Tesla Solar panels a cheapest option?

Tesla solar panels remain one of the cheapest solar panel installation options available. If you find a cheaper option, Tesla will match the price (given the competing quote is for an equal array and comes soon after your quote from Tesla).

Does Tesla match solar panel prices?

Tesla has also suddenly changed its solar panel prices in the recent past. Tesla will match any installer who quotes a lower price. If that quote comes within 14 days and is for an array of the same size or larger, Tesla will match the price on a dollar-per-watt basis. All you need to do is to submit the competing quote through your Tesla account.
