

The EU-Japan Centre currently produces 5 newsletters : EU-Japan NEWS - our flagship newsletter covering the Centre's support services, information about EU (or Member States) - Japan cooperation; Japanese Industry and Policy News "About Japan" e-News (Only available for EU companies / EU organisations)

Developer Eku Energy announced the financial close of the project in early August, with project financing arranged by Japanese bank MUFG. Energy-Storage.news noted at the time that while it marks MUFG's first grid-scale BESS project financing transaction in its home country, the bank has previously participated in financing and investing in BESS projects in ...

Regular readers of Energy-Storage.news will likely be aware that grid-scale battery storage activity in Japan has shown early signs of being on an upward trend, with major Japanese players and foreign market entrants developing projects or forming various joint ventures (JVs) to seek out project opportunities.. However, announcements on the scale of the ...

Japan is gearing up for the World Smart Energy Week in Tokyo as global efforts intensify to achieve net-zero carbon emissions. The exhibition will serve as a hub for cutting-edge technologies and ...

Indeed, the government's three-year Basic Energy Plan aims for renewables to reach 22-24% of the national energy mix by that year. That would peg solar's share at around 64GW. But, as Kaizuka says, nuclear energy isn't generating anymore in Japan since the Fukushima Daiichi reactor was damaged by the 2011 earthquake and tsunami.

TOKYO, Japan -- Small-scale renewables and batteries could team up to replace large fossil-fueled plants -- it just takes a whole lot of little devices to match what big, old ...

Battery storage is urgently needed for the renewable energy transition, and is expected to play a huge role in Australia's future power system. BNEF predicts that by 2050, up to 87GW of solar capacity and 83GWh of storage capacity will be added in Australia.

According to Japan's 6th Strategic Energy Plan, battery storage will be increased as a distributed source of electricity closer to end users and within microgrids. This new policy calls for an increase in installed solar capacity from 79 ...

The nascent grid-scale energy storage market in Japan now has its first-ever dedicated investment fund, and it will be jointly managed by Gore Street Capital, which launched one of the UK's. Gore Street, which launched Gore Street Energy Storage Fund back in 2018, announced this morning (4 December) that it has been

selected along with ...

After 2000, power generation equipment, such as PV system and energy storage apparatus has been put in practical use. Distributed power systems like a smart house, V2H (Vehicle to home), ZEH/ZEC (Net Zero Energy House, Net Zero Energy Community), and VPP (Virtual Power Plant) are spotlighted now. IoT technology will make new generation of ...

At the Energy Storage Summit Asia 2024, held last month in Singapore and hosted by our publisher Solar Media, Eku Energy's APAC technical lead Nick Morley said that having started his career in clean energy working at a solar panel testing facility in Yokohama, Japan, he was "very excited to be working on a BESS project in Japan now".

The Japanese government has recently introduced a variety of measures to reduce energy consumption at home, in order to promote energy conservation by the household sector. Among these measures are the introduction and development of Smart House and Home Energy Management System (HEMS) technologies, which have recently been making rapid ...

One housing products maker offers an 8.96 kWh mass storage battery that can keep an entire home lit all night in a blackout. And Japanese companies have developed equipment to enable electricity to be transferred from an electric car's batteries to the owner's house. Japanese companies have also developed the Home Energy Management System (HEMS) ...

A full interview with Mahdi Behrangrad, head of energy storage at Pacifico Energy will be published on this site for Energy-Storage.news Premium subscribers in the coming days. Energy-Storage.news" publisher Solar Media will host the 1st Energy Storage Summit Asia, 11-12 July 2023 in Singapore. The event will help give clarity on this nascent ...

The Japanese government announced in October 2020 that Japan planned to become carbon neutral by 2050. To achieve this goal, government authorities have implemented various measures to encourage home users to adopt new energy sources, in addition to offering an aggressive subsidy policy for households that implement zero-energy house retrofits.

In a recent Energy-Storage.news Premium interview, Franck Bernard, the energy storage head of developer Gurin Energy said that the Japanese BESS market is ready for scale-up, with the company planning to begin building a 500MW/2,000MWh project in the country in 2026. Read more of Energy-Storage.news" coverage of Japan.

By 2030, official estimates show variable renewable energy reaching 20% of Japan's power mix. Noting the demand case and ever-growing renewables curtailment numbers nationwide, more and more firms are tapping into Japan's battery storage opportunities. We take a look at some of the prominent projects on the horizon.

Considering the growing concerns regarding severe weather conditions due to climate change, other directions of possible research could involve investigating the impact of ESS on a home's energy resilience [44] or looking into the effect of home energy storage when a household leaves a grid network (i.e. off-grid) in a region with extremely low ...

This is due to the island offering plenty of land for large-scale renewables, but lacking grid capacity and relatively little interconnection with the rest of Japan, leading its regional power company Hokkaido Electric, to stipulate that all new renewable energy facilities must be paired with a certain amount of energy storage. Energy-Storage ...

Energy-Storage.news" publisher Solar Media will host the 1st Energy Storage Summit Asia, 11-12 July 2023 in Singapore. The event will help give clarity on this nascent, yet quickly growing market, bringing together a community of credible independent generators, policymakers, banks, funds, off-takers and technology providers.

Each of the 117 smart community microgrid's homes are being equipped with a 4.6kW solar power system, an 11.2kWh lithium-ion battery cell and a Home Energy Management System (HEMS). ...

The idea is to replace the fuel-carrying ships of today which import fossil fuels to Japan and elsewhere and facilitating the uptake of renewable energy. According to 2019 statistics from Japan's Agency for Natural Resources and Energy, almost 85% of the country's power was generated from carbon-based fuels imported by sea.

It is concluded that this kind of energy storage equipment can enhance the economics and environment of residential energy systems. ... Area in Japan. The home energy system of households adopted ...

Energy-Storage.news" publisher Solar Media will host the 2nd Energy Storage Summit Asia, 9-10 July 2024 in Singapore. The event will help give clarity on this nascent, yet quickly growing market, bringing together a community of credible independent generators, policymakers, banks, funds, off-takers and technology providers.

Customer-sited battery systems made and marketed by Japanese manufacturer Kyocera will be used by ENERES to help manage the supply-demand balance of electricity on ...

Electricity Storage in Japan IRENA International Energy Storage Policy and Regulation Workshop 27 March 2014 D&#252;sseldorf, Germany ... Home Wireless base station, data center backup Emergency, Disaster ... Large-scale Battery Energy Storage System (Source) NEDO. Conceptual drawing Supervisory control center Transformers

Company profile: Murata as one of top 10 Japanese battery companies in lithium industry was established in 1950, headquartered in Nagaokakyo, Kyoto Prefecture, Murata Manufacturing Co., Ltd. was originally a ceramic product manufacturing factory, and now its main product is ceramic capacitors, accounting for the world's first share.

Image: Pacifico Energy. In June, Japanese renewable energy developer Pacifico Energy put in action the first trades from battery energy storage system (BESS) assets in the country's power markets. The two projects developed and brought online by Pacifico are each of 2MW output and 8MWh energy storage capacity, one sited on the northern island ...

The renewable energy arm of Japanese petroleum company Eneos said this morning (8 July) that it was selected through a scheme to promote the addition of energy storage technology at solar PV facilities, hosted by the Japanese Ministry of Economy, Trade and Industry (METI) Agency for Natural Resources and Energy.

A few days ago, NGK Insulators said it has received an order for a 69MWh, 6-hour duration battery storage system based on its sodium-sulfur (NAS) battery technology for an energy trading project with utility Sala Energy in Japan's Shizuoka Prefecture. Energy-Storage.news Premium subscribers can read our recent feature interview with Pacifico ...

Security Measures: Security features like intercom systems and keyless entry are becoming more common in modern Japanese homes. Home Automation and Smart Control: Japanese homes can be equipped with advanced home automation systems that allow residents to control lighting, heating, cooling, security, and appliances remotely using smartphones or ...

Storage battery facilities of at least 10 MW capacity that can be independently connected to the grid (Stand-alone SB Facilities) are permitted to participate in the Program. Background. Japan has seen a tremendous increase in the development of renewable energy projects over the past few years, in particular solar and wind projects.
