

Key capture energy storage

What is key capture energy?

Key Capture Energy has a growing development pipeline of energy storage and solar+storage projects across the United States. Key Capture Energy transforms the energy landscape, optimizing grid stability with large-scale battery storage. Explore our projects across the United States and join the energy revolution.

How many GW of battery storage will key capture energy have?

Key Capture Energy is targeting to have more than 1 gigawatt(GW) of battery storage projects in operation in New York, New England, and Texas by the close of 2023, under a variety of offtake contracts. Learn more at keycaptureenergy.com.

What is key capture energy (KCE)?

Key Capture Energy (KCE) builds large-scale battery energy storage systems today that will transition us to the grid of tomorrow. As the US electric grid is increasingly reliant on intermittent wind and solar power, battery storage provides the capacity to keep the lights on when the sun isn't shining and the wind isn't blowing.

Who owns key capture energy?

Key Capture Energy has closed with SK E&S as our new majority owner, accelerating our mission to transition us to the electric grid of tomorrow.

Can battery energy storage save Illinois Ratepayers \$3 billion?

A recent report shows the benefits of battery energy storage for Illinois ratepayers by potentially saving \$3 billion, creating a stable grid and reducing air pollution. Key Capture Energy is committed to making these benefits a reality and appreciates Clean Grid Alliance and American Clean Power Association (ACP) 's leadership.

What is New York's largest energy storage project?

Not only do we own and operate New York's largest energy storage project, we are currently constructing a project for Orange & Rockland and have 700 MW of projects under development in New York, all of which further the state's commitment to a carbon-free electric system by 2040.

Key Capture Energy is an independent developer of large scale battery storage projects. With a focus on meeting the needs of the electric grid, we identify, prospect, develop and deploy energy storage applications, and use in-house ...

About Key Capture Energy Founded in 2016 with offices in Albany, New York and Houston, Texas, Key Capture Energy is a leading developer, owner, and operator of battery energy storage systems and energy solution services across the United States, implementing market optimization software to create a more

Key capture energy storage

advanced and resilient electric grid.

HOUSTON, August 19, 2020 -- Key Capture Energy (KCE) has selected Mitsubishi Hitachi Power Systems Americas, Inc. (MHPS) and Powin Energy Corporation (Powin) to build three utility-scale battery energy storage systems (BESS) projects totaling 200 megawatts (MW) in Texas. MHPS will provide turnkey engineering, procurement, and construction, as well as long-term service ...

Key Capture Energy, Inc., has received site plan approval for its KCE NY 1 project to be built at the Luther Forest Technology Campus in Stillwater, NY. The project, a 20 MW battery energy storage system, will interconnect to the adjacent NYSEG substation. ... energy storage will serve a vital component in the future grid. This project is the ...

US battery storage developer Key Capture Energy has sold investment tax credits (ITCs) for battery energy storage system (BESS) projects in New York and Texas, using new transferability rules. The transaction ...

Image: Key Capture Energy. South Korean energy company SK E& S is now the new owner of US utility-scale energy storage developer, owner and operator Key Capture Energy. Key Capture Energy (KCE) said yesterday that the deal has been closed, with three members of SK E& S' executive team joining its board of directors.

Describing itself as an energy storage independent power producer (IPP), the company's strategy has largely focused on finding regions with constrained grids ripe for the value proposition of battery energy storage system (BESS) assets. Key Capture Energy (KCE) then owns and operates its projects, logging a handful of industry milestones such ...

Acquired by green energy giant SK E& S in 2021 and headquartered in Albany, New York, Key Capture Energy is meeting this need by identifying, developing, constructing, and operating energy storage ...

Key Capture Energy is a leading independent power producer of utility-scale battery storage projects. Our clean energy expertise and unmatched optimization technology are creating a more advanced and resilient grid for all customers.

Jeff Bishop of energy storage developer-owner-operator Key Capture Energy (KCE) has long been vocal in highlighting the potential his company sees for grid-scale battery storage in the Midcontinent Independent System Operator (MISO) electricity market, of which Michigan is a part.. While the US' energy storage market has grown rapidly in the past few years, growth ...

ALBANY, N.Y., Sept. 8, 2021 /PRNewswire/ -- Key Capture Energy, LLC ("KCE"), a leading developer, owner and operator of energy storage projects in the United States, today announced that it has ...

Brian Hayes, CEO at Key Capture Energy gives his first interview since taking on the role, exclusively for

Key capture energy storage

Energy-Storage.news Premium. Likely a familiar name to our readers, Key Capture Energy (KCE) is known as a ...

Headquartered in Albany, New York, Key Capture Energy is meeting this need by identifying, developing, constructing, and operating energy storage solutions to foster greater deployment of renewable energy, create a more stable electric grid, and provide value to all ratepayers. Key Capture Energy is targeting to have more than 1 gigawatt (GW ...

Texas has led the nation for years in installed wind capacity and solar is becoming the state's fastest-growing electricity source, making the quick response of battery storage a cost-effective solution to provide grid resiliency ...

At Key Capture Energy, we are fortunate to have a talented team of employees who work hard every day to identify, develop, construct and operate large-scale energy storage projects that play a key role in transitioning us to the grid of tomorrow. Without the hard work and dedication from these individuals, Key Capture Energy would not be the ...

US battery storage developer Key Capture Energy has sold investment tax credits (ITCs) for battery energy storage system (BESS) projects in New York and Texas, using new transferability rules.

Energy storage will be a cornerstone for the clean energy transition. At Key Capture Energy, we're unlocking the grid of tomorrow - today. We currently have 14 energy storage facilities in Texas and New York operating or under construction totaling 623MW, with an additional 9,000 MW in development across the country.

Discover Key Capture Energy's most recent press releases and announcements, legislative and regulatory comments, and blog posts. For more information, please contact the media team at . Featured. Key Capture Energy Announces Brian Hayes as New CEO. Read More. News.

The U.S. Energy Storage Association (ESA), a national trade association dedicated to energy storage, welcomed our co-founder and CEO, Jeff Bishop, to its Board of Directors today. Jeff is pleased to join other leaders from across the storage value chain in support of the ESA's efforts to accelerate the widespread use of competitive and reliable energy storage systems throughout ...

NYSERDA Support Enables Projects Essential for New York's Zero-Emission Targets. Albany, NY - Nov. 29, 2021 - Key Capture Energy, LLC (Key Capture Energy), a leading U.S. energy storage independent power producer, has started construction of KCE NY 6, a 20 megawatt (MW) energy storage project located outside of Buffalo. This project was enabled by ...

Albany, NY - February 11, 2021 - Key Capture Energy, LLC (KCE), a leading developer, owner and operator of standalone energy storage projects in the United States, today announced the recent closing of \$93.3 million financing on its portfolio of six battery energy storage systems located in Texas. Together, these projects

Key capture energy storage

represent a total of 230 megawatts (MW) of energy ...

Key Capture Energy may be growing as indicated by several developments in its operations. The company has been involved in significant battery energy storage projects, including a 400 MW project that is considered crucial to Connecticut's renewable energy future.

Jeff Bishop, co-founder and CEO of US battery storage developer Key Capture Energy joins our series looking back at 2023 and looking ahead to 2024. The company's business model is to develop large-scale grid-connected energy storage assets to own and operate, picking emerging markets that it sees exhibiting fundamental drivers for storage ...

Image: Key Capture Energy. Key Capture Energy is in the construction phase of a battery storage system in New York that will inform how the developer approaches much bigger projects in the state. Key Capture Energy's KCE NY 6 is a 20MW/40MWh (two-hour duration) lithium-ion battery energy storage system (BESS) just south of Buffalo, in Upstate ...

Brian Hayes, CEO at Key Capture Energy gives his first interview since taking on the role, exclusively for Energy-Storage.news Premium. Likely a familiar name to our readers, Key Capture Energy (KCE) is known as a developer of battery energy storage system (BESS) assets in the US with a focus on an own-and-operate model akin to that of an ...
