The heightened focus on energy storage is driven by the need for a reliable energy supply amidst frequent power outages and grid failures. As Lebanon faces a chronic electricity shortage, the integration of energy storage systems has become paramount. These systems ensure a steady supply of electricity,

Through this integration process, it becomes possible to optimise BESS operations and communications with real-time monitoring and control. In short, application-specific IoT solutions for BESS can help facilitate the energy industry's transition towards a successful future driven by digitalisation, decentralisation, democratisation and decarbonisation, catering ...

Long-duration energy storage (LDES) is the linchpin of the energy transition, and ESS batteries are purpose-built to enable decarbonization. As the first commercial manufacturer of iron flow battery technology, ESS is delivering safe, sustainable, and flexible LDES around the world.
