

Loxone power supply and backup

What is a loxone power supply & backup?

The Loxone Power Supply & Backup is a DIN-rail mounted power supply for up to 40A. It offers seven outputs providing 24VDC for up to 10A each. Each output comes with a dedicated fuse and power measurement. Additionally connect a 36VDC battery to power-backup your Loxone installation in case of power failure. Of course, without interruption.

How do I configure a power supply in loxone?

The configuration of the power supply is done with the Function Block of the same name in Loxone Config. Drag the power supply from the periphery tree to the programming page to insert the function block. For the backup function, a battery with 36V nominal voltage is connected to the battery input.

What are the benefits of using a loxone system?

Thanks to the integration into the Loxone system, the usual notification types (push, call, email) can be used. Saves space and extra terminals in the distributor, as each outlet can be secured to suit the cable cross-section. Blackout? No worries! Power failure - the light goes out, the door stays locked. Not with the Power Supply & Backup

What power supply do I need for my loxone?

The Loxone 4.2A/100W power supply, the smallest suitable power supply, can power e.g. one Audioserver or two Stereo Extensions. If the CPU temperature reaches a critical point, the outputs of the device are switched off. This can be due to short-circuits, overloaded switching loads or too high an ambient temperature.

How does a loxone installation work?

In a Loxone installation, peripheral devices run on 24V instead, which is supplied by centrally-installed power supplies. This is both safer and more efficient. It's also more energy conscious because the integrated devices are operated by a lower voltage, saving your customers money and energy.

How long does a 24V loxone battery last?

The Power Supply & Backup can ensure that your 24V Loxone installation will maintain functionality during an outage. For example, with a 20Ah battery, this means approximately 8 hours.

The new Power Supply & Backup (Art. 100401) is a DIN rail power supply that takes over the power supply for all your Loxone products - in combination with an external battery even in the event of a power failure. The seven 24V outputs provide a total of up to 40A, have power measurement and are equipped with replaceable fuses.

10 Amp fuses for the Loxone Power Supply & Backup - offering all the power you need for your Loxone installation, with the option to expand the system to include an uninterrupted power supply for the important

Loxone power supply and backup

features in your home or building.

Die Power Supply & Backup kann auch unabhängig von einer Loxone Installation verbaut werden und mit einer Batterie für die Backup Funktion verwendet werden. Vorteile der einzelnen Absicherung: Last eine Sicherung aus, werden Sie in ...

The efficient, safe & worry-free power supply - even in the event of a power failure, seamless switching to battery operation for 24V installation. Safe from the first second - protects the building and the people in it - due to integrated fuses.

Loxone Power Supply & Backup. Power Supply & Backup je napájecí zdroj na DIN liště. V kombinaci s externí baterií; také může být použit pro bez přerušení přechod k baterii. Inteligentní instalace poskytuje celkem až 40 A výkonu 24 V. Zdroj je vybaven i měřením výkonu a návratovou pojistkou pro každou výstupní stupnici. Při testech...

Deze functieblok wordt gebruikt om een Loxone Power Supply & Backup te integreren. Eerst worden in de instellingen van de bouwsteen de op de 24V uitgangen aangesloten belastingen gelabeld. Vervolgens geeft het blok het huidige vermogen van de 24V uitgangen en geeft het informatie over de status van de optionele backup modus en de backup ...

The Loxone Power Supply & Backup is a DIN-rail mounted power supply for up to 40A. It offers seven outputs providing 24VDC for up to 10A each. Each output comes with a dedicated fuse and power measurement. Additionally connect a 36VDC battery to power-backup your Loxone installation in case of power failure. Of course, without interruption.

Le Loxone Power Supply & Backup est une alimentation électrique montée sur rail DIN jusqu'à 40A/25A. Il offre sept sorties fournissant 24 VCC jusqu'à 10 A chacune. Chaque sortie est livrée avec un fusible dédié et une mesure de puissance.

The Loxone Power Supply & Backup is a din-rail mounted power supply for up to 40A. It offers seven outputs providing 24VDC for up to 10A each. Each output comes with a dedicated fuse and power measurement. Additionally connect a 36VDC battery to power-backup your Loxone installation in case of power failure. Of course, without interruption.

This function block is used to integrate a Loxone Power Supply & Backup.. First the loads connected to the 24V outputs are labeled in the settings of the block. Then the block provides the current power of the 24V outputs and provides information about the status of the optional backup mode and the backup battery.

Price shown is the Loxone partner purchase price. This price does not include planning, installation and services. In stock. Shipping within 24 hours. ... 200414, 200415 Fuse for Power Supply & Backup (2A, 10A)
