Are Lunt solar telescopes any good?

Hi Man68, I've found that all Lunt solar telescopes, whether it is internal pressure tuner (such as LS60MT that you are inquiring about), internal tilt tuner, or using a front stack have been excellent performers and very well optimized for the task. I'm not entirely sure what you are referring to by "rigor";

What size is a Lunt solar telescope?

Although Lunt makes solar telescopes in a variety of sizes, this version has an ample 80 mm aperture. The focal length of 560 mm makes this a f/7 focal ratio scope. The modular design allows for a quick change between solar and nighttime viewing or photographing. This telescope is compatible with many observing and photography accessories.

How big is a Lunt LS152THa solar telescope?

The Lunt LS152THa solar telescope's 6-inch aperture is big for a solar telescope, and that translates into great views. Credit: Pete Lawrence The LS152THa overcomes the prohibitively high cost of a full-aperture 6-inch etalon by using a 2.5-inch unobstructed one further down the optical path from the main objective lens.

Is Lunt a good PST?

My Lunt 50 was a noticeable step up from the 35 and a direct comparison to a PST demonstrated a significant advantage to the 50. Now, getting Lunt to actually return emails is another thing entirely since Rikki left. Now, getting Lunt to actually return emails is another thing entirely since Rikki left. Faye is fine with phone calls, however.

Is Lunt LS80 a good ED scope?

The Lunt LS80 optics, used at night, exhibited very very little CA compared with my older SV80ED, which was a very well regarded ED scope for day and night. I believe my older LS80 is FPL-53, based on the minimal CA. Performance of the newer modular scopes should be just as good, if not better.

Find helpful customer reviews and review ratings for Lunt Solar Systems - Day and Night Modular Professional Telescope, All-in-one 80mm Aperture Refractor Astronomy Kit for Observing The ...

Lunt 40mm review: UPDATE! - posted in Solar Observing and Imaging: Received my replacement 40mm Lunt telescope and one word to describe it: WOW!!!! I am MORE than pleased with this! NO RED GLOW! The view visually for the first time was AWESOME! Beautiful inside and out! Can't wait to Double Stack it. I was so excited, forgot to take picture of it setup ...

Extra-low Dispersion lenses for bright, true color views Large 80mm ED lenses pull in an immense amount of light 21mm eye relief provides plenty of comfort and distance for eyeglass wearers Tripod mounting pier allows attachment to any standard photographic tripod Includes lens caps, neck strap, and a soft carry bag to

protect the optics

Lunt Herschel Wedge First Impressions - posted in Solar Observing and Imaging: So Ive leaned into solar pretty hard over the past two months, with the excuse that it would give me something to do with with my equipment when the planets are gone. Ive only had several outings due to weather and schedule. About 6 weeks ago I bought a Quark Chromosphere, ...

Published: September 25, 2023 at 3:00 am. With an aperture of just 35mm, the Lunt LS35 Basic solar telescope is among the smallest solar scopes we've reviewed. The LS35 Basic uses a full aperture, unobstructed etalon with a ...

Page 1 of 2 - Test or opinion on the new lunt modular telescope ? - posted in Solar Observing and Imaging: Lunt offers a new modular telescope for H-alpha sun observation and for night / terrestrial use ? Has anyone already done tests or reviews, especially for observation without the filter in the case of 60 mm diameter ? Any opinion? Thanks a lot

Lunt Solar Systems utilizes the new Pressure Tune System, or Doppler True Tuning system in most of our Solar Telescopes. The system works because the etalons used in the current Lunt designs are air spaced. The center wavelength can be manipulated by several methods. Here are some Pro"s and Con"s:

Description. Get Eclipsed: The Complete Guide to the 2 North American Eclipses \*Each book also comes packaged with 2 safe solar eclipse glasses! After selling a record breaking 750,000 copies of our Get Eclipsed book for the 2017 eclipse, we are back with an even bigger and better guide!.
