Makita tools are designed to work with specific battery voltages, and using a battery with a higher voltage than what is specified can overload the tool and cause damage. Additionally, 40-volt batteries are much larger and heavier than 18-volt batteries, and they won't fit in an 18-volt tool's battery compartment.

The Makita 18V LXT Lithium-Ion battery charges faster and works longer than standard Lithium-Ion batteries, giving you and your cordless tools unmatched performance and productivity to take on the most demanding applications. The Makita 6.0 Ah battery, model BL1860B, combines more run time (two-times more run time per charge than the Makita 3.0 Ah battery) with a category ...

MAKITA 18V LXT (4.0 Ah) Lithium-Ion Battery BL1840B . The Makita 4.0 Ah battery offers maximum run time for prolonged, heavy-duty applications. 4.0 Ah battery offers 33% increased run time versus 3.0 Ah batteries with no added weight or bulk. LED charge level indicator displays approximate remaining battery power.

You might be tempted to use a different battery on your Makita tool than what is specified in the manual or on the compatibility chart. However, it's not recommended to do so. Different batteries have different voltages and power outputs, which can cause damage to your tool or even create a safety hazard.
