Who makes battery energy storage systems?

The battery storage firm was also selected by UK energy firm Centrica to design and deliver a 49MW lithium-ion battery energy storage system. LG Chem Headquartered in Seoul, South Korea, LG Chem is one of the major providers of energy storage systems (ESS) operating in the world today.

Are batteries the future of energy storage?

As renewable energy generation depends on climatic conditions, it may not always be available when it's most needed while excess power can be wasted - to address this issue, energy storage technologies, including batteries, have been developed over the past few years.

Is battery storage a viable alternative to existing power generation?

Photo: courtesy of Tesla. Battery storage has been touted as critical to the development of renewables as a wholesale alternative to existing power generation but only a handful of companies have risen to the top of the pile as credible contenders to bring it to market at scale.
