

Milwaukee 18v lithium ion battery won't charge

How do Milwaukee M18 batteries charge?

Milwaukee M18 batteries are the powerhouse behind many tools, but their charging process can sometimes be a puzzle. It's like a dance between the charger and the battery, where both need to be in sync. When you plug in your battery, the charger evaluates its condition before initiating the charge.

Why is my Milwaukee M18 battery not charging?

If your Milwaukee M18 battery is not charging, it's also worth checking if there is power to the charger. This can be easily done by plugging in another device or tool to the same outlet and seeing if it powers on. If there is no power to the charger, then you may need to check your circuit breaker or try a different outlet.

Will a battery fit on a Milwaukee Charger?

And, of course, batteries from other manufacturers won't fit on a Milwaukee charger. The charger has bays for both its clip-on and stem batteries. When you insert a battery for charging, a red LED comes on and burns steadily until the battery is charged. When the charge is complete, a green light comes on and burns steadily.

Why is my Milwaukee battery not charging?

When the battery cells are damaged, the battery may show a green light, indicating that it's charged, but it won't hold a charge for very long. To fix this problem, you may need to replace the damaged battery cells or replace the entire battery. A faulty battery charger can also cause a Milwaukee battery that won't charge.

Why does my Milwaukee M18 battery show a green light?

A common issue with Milwaukee M18 batteries is their failure to charge, often indicated by a green light. This problem can be frustrating, especially for those relying on their tools for work or projects. Milwaukee M18 batteries may show a green light yet fail to charge due to several reasons. A simple reset can sometimes solve the issue.

Should I replace my Milwaukee M18 battery?

Considering Battery Replacement Lithium-ion batteries, including the Milwaukee M18, have a limited lifespan. If your battery has reached the end of its life and refuses to charge, it might be time to consider a replacement. Remember to recycle the old battery responsibly and purchase a new one for your power tool applications.
