

Mothership enters solar system

Could an alien mothership be in the Solar System?

A draft paper by a Harvard scientist and the head of the Pentagon's UFO office has raised the idea an alien mothership could be in the solar system, sending out tiny probes dubbed 'dandelion seeds' to explore the planets within. When you purchase through links on our site, we may earn an affiliate commission. Here's how it works.

Could extraterrestrial motherships visit planets in our Solar System?

There is a possibility that extraterrestrial motherships and smaller probes may be visiting planets in our solar system, the head of the Pentagon's unidentified aerial phenomena research office noted in a report draft shared Tuesday.

Would Earth be enticing if the Earth was a mothership?

Earth, however, would be particularly enticing, given the large amount of water on our planet. The alien civilization that created these probes, they wrote, would not need to be on the mothership. In fact, it's likely they wouldn't be able to communicate with the probes.

Could a mothership send a 'dandelion seed' to Earth?

It proposes that an alien mothership in the solar system could send probes to our planet that could land just like "dandelion seeds," where they "parachute" while entering our atmosphere to slow down so that they don't burn up on entry. Such probes could use starlight to "charge their batteries" or even use liquid water as fuel.

Did 'Oumuamua' come from outside the Solar System?

But Loeb found himself thinking that it would be the exact type of behaviour that you would expect from an alien spacecraft. He noticed another coincidence too. Six months before 'Oumuamua's closest approach to Earth, a metre-sized meteor hit the Earth. Its speed and trajectory indicated that it came from outside the solar system.

Should we look for evidence of transmissions from our Solar System?

In a recent study, two researchers from the University of Liège and the Massachusetts Institute of Technology (MIT) recommend that we look for evidence of transmissions from our solar system.

Pentagon officials said in a draft document co-authored by a Harvard scientist, that a mothership could send mini probes to planets similar to missions conducted by NASA.

Pentagon officials have warned that an alien mothership in our solar system could be sending probes to Earth.. A recent report published by the US intelligence hub noted how "parent craft ...

Last July 26, Congress held a hearing on the issue of UAPs, where lawmakers and a large crowd of spectators

Mothership enters solar system

listened as a former Air Force intelligence officer testified that the ...

Could an alien mothership be hovering around the solar system, sending out tiny probes to explore planets? According to a Harvard scientist and a Pentagon official, it's possible.

Our solar system is a relative newcomer, having formed 4.5 billion years ago, and humanity has only existed for the last 200,000 years. ... The information you enter will appear in your e-mail ...

Callisto is one of the Galilean moons and the home of the Galilean Squids. Their ships are the only sources of the Alien Hull and Alien Fuselage. Callisto's surface has an outpost as well as holed out entrances, where one of the Galileans can be found (the squid was formerly the guardsman at the elevator). Beneath the surface is a giant city in a hollowed-out Callisto, ...

Shawn Lum, who is a senior lecturer at the Asian School of the Environment, told Mothership how the floating solar panels impact the aquatic environment. The panels will block sunlight from ...

With proper design, these tiny probes would reach the Earth or other solar system planets for exploration, as the parent craft passes by within a fraction of the Earth-Sun separation -- just like ...

A highly unusual object was spotted traveling through the solar system in 2017. Given a Hawaiian name, Oumuamua, it was small and elongated--a few hundred meters by a few tens of meters ...

There is a possibility that extraterrestrial motherships and smaller probes may be visiting planets in our solar system, the head of the Pentagon's unidentified aerial phenomena ...

The UFO researchers consulted Solar System Scope, an online 3D simulation of our solar system in real time, and confirmed that the object was a foreign body, or more precisely, a massive artificial structure that entered our solar system only recently.

Alien Mothership, Pentagon officials, and Harvard scientists suggest that an alien mothership could be watching us. Credit: Megan Rosenbloom / Flickr / CC BY-NC 2.0 The head of the Pentagon's UFO office and a Harvard scientist have presented a new idea about the possibility of an alien mothership being present in our solar system.. They proposed that small ...

A mysterious cigar-shaped object spotted tumbling through our solar system last year may have been an alien spacecraft sent to investigate Earth, astronomers from Harvard University have suggested.

A mysterious object in our solar system could be an alien mothership sending smaller probes to monitor the Earth, according to a new draft report co-authored by the head of the Pentagon's UFO research office. Sean Kirkpatrick, director of the Pentagon's new All-domain Anomaly Resolution Office, ...

Mothership enters solar system

The possibility of off-axis emitting probes opens a new avenue for the search for alien devices in our solar system. We intend to explore it further, observing the antisolar ...

Pentagon officials wrote a report that there may be a mothership in our solar system sending these little UFOs like Independence Day and no one talking about it LMAAAwearegunnadieOOOOOOO -- We ...

"With proper design, these tiny probes would reach the Earth or other solar system planets for exploration, as the parent craft passes by within a fraction of the Earth-Sun separation -- just ...

The leader of the Pentagon's UFO identification office, who recently speculated about the potential for an alien "mothership" in the solar system and "extraterrestrial technological probes ...

The Martian Mothership enters the Solar System. The Martian Mothership was a massive starship featured in It's Walky!. The Mothership is a large-scale invasion craft and mobile command center, designed to transport entire armies at a time. Spoiler warning! Plot and/or ending details follow.

The head of the Pentagon's UFO investigative unit, the All-domain Anomaly Resolution Office (AARO), and a Harvard astrophysicist claim in a new research paper that alien "motherships" could be flying through our solar system.. In the paper published on March 1, Dr. Sean Kirkpatrick, the director of the AARO, and former Harvard Astronomy Department Chair ...

Pentagon officials said in a draft document last week that aliens could be visiting our solar system and releasing smaller probes like missions conducted by NASA when studying other planets.. A draft research report authored by Sean Kirkpatrick, the director of the Pentagon's All-Domain Anomaly Resolution Office (AARO) and Abraham Loeb, chairman of Harvard ...

The head of the government's UFO office says alien "motherships" could be flying through our solar system and sending probes to Earth in a new science paper.. The draft paper, published last week ...

Oumuamua, like most comets, is rich in water. Before the comet entered the solar system, the extreme cold of deep space would cause the water to freeze into ice in what is known as an amorphous state.

The Mothership is a large alien Ship originating from the Galilean Squids. It appears inside Callisto, and launches once Callisto is nuked. The Mothership features a triangle hull equipped with two turrets and 3 engines at the back, It also has 2 opened panels to eject the different types of Galilean ships to attack any nearby colonies. The Mothership is equipped with very heavy ...

Discovered as it was leaving the Solar System, "Oumuamua was unusual in that it appeared to be roughly cylindrical rather than potato-shaped as is usual for asteroids. It also appeared to ...

Pentagon officials said in a draft document last week that aliens could be visiting our solar system and

Mothership enters solar system

releasing smaller probes like missions conducted by NASA when studying other planets.. A ...

US Pentagon Gives A Nod To UFOs, Director Says Alien Mothership Could Be In Our Solar System Last week, the Pentagon's unidentified aerial phenomena research office noted in a report that there is a possibility that extraterrestrial life and airships may be visiting our solar system. Sejal Jakhwal Updated: Mar 14, 2023, 19:29 IST.

Officials from the Pentagon have laid bare the possibility of an alien mothership visiting our solar system and directing probes to Earth, much like NASA have been doing when studying other planets.

A draft paper by a Harvard scientist and the head of the Pentagon's UFO office has raised the idea an alien mothership could be in the solar system, sending out tiny probes dubbed 'dandelion seeds' to explore the planets within. Could an alien mothership be hovering around the solar system, sending out tiny probes to explore planets?

? Shocking Pentagon Announcement: Alien Mothership in Our Solar System! ?? Breaking News! The Pentagon has broken its silence on an alien mothership enter...
