The original LEAF actually did have a small solar panel in the rear spoiler that was meant to top off the 12V in this manner. The upcoming Aptera will offer integrated solar panels that charge the main pack. Thanks to the much higher efficiency of the vehicle, such a scheme could actually provide some meaningful range boost.

Cargo cover o Quick charge port. S o 80 kW AC synchronous electric motor o 24 kWh lithium-ion (Li-ion) battery o Zero Emissions Vehicle (ZEV) o Front and rear disc brakes with regenerative braking system

Nissan Leaf Solar Panel Spoiler . ... The Nissan Leaf Solar Panel is a new addition to the Leaf lineup that allows drivers to charge their car using solar power. The solar panel is installed on the roof of the car and can be used to charge the battery while the car is parked. The solar panel is also removable, so it can be used to charge the ...

Over at the Nissan dealer, the Leaf that comes closest to matching the Focus Electric in terms of equipment is the top-of-the-line SL model at \$35,690. That price includes a Quick Charge port, LED headlights, leather seats and a photovoltaic solar panel rear spoiler. Compared to the Focus, all it's missing is a premium sound system.

Anyone who loves the Leaf solar panel should be THRILLED with vinyl stick-on solar panels! They achieve the exact same effect at a fraction of the cost. When the power was out throughout San Diego, I was thinking impure thoughts about hooking my grid-tie (dead) solar system to the Leaf's DC CHAdeMO port.

Some of the standout exterior features of the 2013 Nissan Leaf are: Aerodynamic LED headlights (SL, available in SV) Dual power heated outside mirrors; Photovoltaic solar panel rear spoiler (SL) Fixed roof antenna with blue accent; Charge port light and lock ; ...
