The original LEAF actually did have a small solar panel in the rear spoiler that was meant to top off the 12V in this manner. The upcoming Aptera will offer integrated solar panels that charge the main pack. Thanks to the much higher efficiency of the vehicle, such a scheme could actually provide some meaningful range boost.

The Leaf SL adds a photovoltaic solar panel on the rear spoiler, automatic LED headlights (low beams only), leather seats, and an auto-dimming rearview mirror, among other features.

The additional cost per car would be in the region of \$4,000 which makes it just far too expensive to be considered as a useful option. However, solar prices are continuing to drop. Within 3-5 years, I wouldn't write off the possibilities of Nissan offering a proper solar panel on the top of their LEAF electric car at a much more reasonable cost.

Nissan LEAF SV shown in Blue Ocean with optional equipment. ... o Photovoltaic solar-panel rear spoiler o

Cargo cover o Quick charge port. S o 80 kW AC synchronous electric motor o 24 kWh lithium-ion (Li-ion) battery o Zero Emissions Vehicle (ZEV) o Front and rear disc brakes with regenerative braking system

Nissan Leaf Solar Panel Spoiler . ... The Nissan Leaf Solar Panel is a new addition to the Leaf lineup that allows drivers to charge their car using solar power. The solar panel is installed on the roof of the car and can be used to charge the battery while the car is parked. The solar panel is also removable, so it can be used to charge the ...

Over at the Nissan dealer, the Leaf that comes closest to matching the Focus Electric in terms of equipment is the top-of-the-line SL model at \$35,690. That price includes a Quick Charge port, LED headlights, leather seats and a photovoltaic solar panel rear spoiler. Compared to the Focus, all it's missing is a premium sound system.

Anyone who loves the Leaf solar panel should be THRILLED with vinyl stick-on solar panels! They achieve the exact same effect at a fraction of the cost. When the power was out throughout San Diego, I was thinking impure thoughts about hooking my grid-tie (dead) solar system to the Leaf"s DC CHAdeMO port.

Some of the standout exterior features of the 2013 Nissan Leaf are: Aerodynamic LED headlights (SL, available in SV) Dual power heated outside mirrors; Photovoltaic solar panel rear spoiler (SL) Fixed roof antenna with blue accent; Charge port light and lock; ...

Perhaps this could be done later. If Nissan was considering this, and they did not want to come up with a solar roof option, they could simply use the space on the rear spoiler better. It appears that some prototype Leafs did

just that: they had a solar panel twice of perhaps three times the size of the current one.

Nissan has announced that U.S. pricing for the new 2013 Nissan LEAF will start at an MSRP of \$28,800 for the newly-added S grade, making it the lowest priced five-passenger electric vehicle sold in the United States. ... fog lights, photovoltaic solar panel rear spoiler and HomeLink® Universal Transceiver.
