How do I choose a solar company in New Jersey?

These include obtaining permits to operate (PTO), providing financing, and offering price match options and mobile performance tracking options. New Jersey homeowners looking for more than just solar panels should consider Momentum Solar and Trinity Solar. Both companies received high scores in this section.

Is solar power a good choice in New Jersey?

Opting for solar power in New Jersey is an economically wise choice. Why? Well,for instance,a standard residential solar panel system in the state can produce approximately 1,200 to 1,500 kWh per year for every kilowatt (kW) of installed solar capacity. What does this mean? Take a 5-kW system which is a residential standard.

How much do solar panels cost in New Jersey?

Most New Jersey homeowners spend roughly \$23,590on a home solar panel system, which comes out to \$16,513 after factoring in the 30% federal solar tax credit (ITC). These costs reflect the average solar panel system size of 7 kilowatts (kW), but you might be able to save money on solar panels if a smaller system could be installed on your home.

How many solar installers are there in New Jersey?

According to the Solar Energy Industries Association (SEIA), there are around 400 solar installers that operate in New Jersey, which makes finding the best ones a challenge. I've made your job much easier by using my industry knowledge and experience to narrow the list down to just the seven best installers in the state.
