

Planetary positions now

What is sidereal planetary position in Vedic astrology?

It lists current position of all planets according to Vedic Astrology which uses sidereal zodiac. Sidereal Planetary positions are also known as Nirayana Planetary Positions.

Which view shows all planets arranged around the Earth?

The view above shows all the planets arranged around the Earth as if they were in located on a sphere with the earth in the centre - a geocentric view. This ensures all planets are shown in the correct zodiac sign. Which Planets are in retrograde? Planets glow as they go into retrograde.

How can I watch a planetary alignment video?

You can also watch a video of the planet positions using our yearly planetary alignment videos. With our desktop app, you can rewind time to see the heavens at the time of your birth and discover for yourself which sign each planet was in and which were in retrograde.

What are astrology planets & how do they affect us?

Each of the planets (which for astrology includes the sun and the moon) control a different aspect. In general terms they can be listed as: The Sun, Moon, Mercury, Venus and Mars are the personal planets which affect our personalities and immediate relationships. The more distant planets affect how we interact with the world in a more general way.

Why do planets have a slider control?

The reason is that the app has a slider control which changes the orbits of the planets from a diagrammatical view (i.e. all the planets in nice neat, equally separated, circular orbits) to a real view (i.e. all the planets in elliptical orbits with all the inner planets squashed in next to the Sun and the outer planets being widely spaced).
