Solar-powered outlets do work, but they have limited capacity and are heavily dependent on the weather. Due to their limited capacity, they typically only work while the sun shines. However, if you have a small device you want to use while you're outdoors enjoying the sunshine, they'll work just fine.

I can charge nine hours on a sunny day. Solar wires run into garage, through drywall and down to basement with solar charging connection to newer version of Hysolis (MPS3K). Extension cord to mostly subterranean basement 5000 BTU window unit. I was able to cool the whole basement using solar energy only. Battery charge remained close to 100%.
