

Power bank universal usb backup power instrukcja

What is a power bank & how does it work?

Basically, a power bank serves as an external battery for cell phones, tablets and so on, which can power up your devices in case they are running out of juice. Since a power bank is in essence a battery pack to charge cell phone, you may still wonder or "How do you charge a power bank" and "How to use a power bank after charging it fully".

How do I charge my GP powerbank Universal batteries?

The LED indicator (s) will light up in green when charging is in progress. Please refer to the charging time table to ensure the batteries are fully charged. Unplug the charger from the power source and remove the batteries when they are fully charged. For the best performance and safety, charge only GP NiMH batteries with GP PowerBank Universal.

How do you charge a power bank?

To charge and use a power bank, you simply charge it up by plugging it into an electrical outlet, and then connect your electronic device to the power bank via a USB cable after charging of the power bank is done.

Can a power bank charge a laptop?

Power banks are most commonly intended to charge mobile devices such as cellphones, tablets, cameras, and portable speakers. They can also be used to charge laptops provided the ports allow for it and the power charging rate is compatible. Power banks are generally not suited to charging larger electronic devices in your home.

How many volts can a power bank charge?

Fast Charging: The power bank supports 5.1 V/2.4 A, 9 V/2 A and 12 V/1.5 A using a USB-A cable. The maximum output power is 18 W when charging the devices simultaneously using dual output ports.
Compatibility: Built-in smart USB charge controller, compatible with most smartphones, tablets, and devices.
