## Raptor power systems

Who is Raptor power systems?

Raptor Power Systems is an ISO 9001: 2015 quality controlled manufacturer of power distribution units and ups systems for commercial, industrial, military, shipboard, and crypto mining applications. Buy directly from the manufacturer and receive the best support, customer service, and price in the industry.

#### What is Raptor ®?

o Raptor® developed the first web-based visitor management systemdesigned for schools and monitors visitors, contractors, and volunteers who enter a building. Find out what's happening in Downers Grove with free, real-time updates from Patch.

## What is a Raptor X module in a UPS system?

The Raptor X Modules are scalable and reliable Uninterrupted Power Supply (UPS) systemsmanufactured to remove single points of failure and add redundancy. They come in 3 phase,60 - 900kVA. The rack design provides maximum power in a compact enclosure,saving up precious floor spaceand facilitating maintenance.

#### What kind of power does a raptor use?

All Raptors are powered by single-phase 240 VAC 50/60 Hzand include an automatic thermal-magnetic cut-off switch for protection against internal failures. A protective nylon cover featuring a generous pocket for accessories is also included as standard.

### Who is Raptor technologies?

o Raptor Technologies is the nation's leading developer of integrated school safety technologies for K-12 schools across the United States. o Raptor® developed the first web-based visitor management system designed for schools and monitors visitors, contractors, and volunteers who enter a building.

#### How does Raptor work?

Raptor robotically applied ARM, ProARM®, ARMPlus(TM) and PTA applied Tungsten Carbide Overlay making tips and adapters sharper and last longer, helping crusher teeth crush harder and allowing blades and grouser lugs to penetrate and wear longer. PTA applied Tungsten Carbide Overlay in service on table segment mill liners.

All PDUs, standard or custom, come with a full 2-year warranty on parts and labor. Raptor Power will, at its discretion, repair or replace any product found to be defective. Phone support is included during the 2-year warranty period.

At Raptor Power Systems, we have facilitated and manufactured the components for the deployment of over 1GW of miners. Below is a detailed description of the factors and components that go into a crypto mining power distribution. This will guide you through the product selection process and demonstrate best practices
