

1. Best Practices and Literature Review 1.1 Philippines Rural Renewable Energy Why Small-scale RRE?
Even though on-grid power transmission remains the primary and the cheapest source of electricity in the Philippines, its connection to the rural areas has become unviable both

This chapter presents a review of selected literature to analyze and underline the application area and expansion of the most used MCDM methods in renewable energy analysis. Classification of the year, application area, and method used is presented to highlight the trends of research in alternative energy decision-making.

Issues of environmental degradation, finite quantity and uneven spatial distribution of fuels in nature, and growing demand accentuated by volatility of oil prices have led to the ...

This review discusses the world's energy needs, renewable energy technologies for domestic use, and highlights public opinions on renewable energy. A systematic review of ...

Abstract. The impact of variable renewable energy (VRE) sources on an electricity system depends on technological characteristics, demand, regulatory practices and renewable ...

Issues of environmental degradation, finite quantity and uneven spatial distribution of fuels in nature, and growing demand accentuated by volatility of oil prices have led to the global clean renewable energy transition (RET). With an objective of examining the current knowledge-stock on RET, we re ...

The mission of Renewable and Sustainable Energy Reviews is to communicate the most interesting and relevant critical thinking in renewable and sustainable energy in order to bring together the research community, the private sector and policy and decision makers. The aim of the journal is to share problems, solutions, novel ideas and technologies to support ...

Also, according to the International Renewable Energy Agency (IRENA), the share of non-fossil fuel-based generation sources, i.e., renewable energy sources should increase to 57% globally by 2030 in order to meet the Paris Agreement's target of keeping the average global temperature rise well below 2 °C.

Table 6 shows that at least one intermittent renewable energy source is integrated into the energy mix of NII systems under examination, ... The literature review on this topic shows that islands may operate satisfactorily under very high RES penetration levels, up to 100%, and survive severe disturbances, provided that fast-response storage ...

Accelerating the transformation of energy structure and expanding the deployment of renewable energy (RE)

have become important means, for worldwide countries, to cope ...

Energy Analysis, a Literature Review Rimal Abu Taha and Tugrul Daim Abstract Energy impacts so many aspects of our lives. This makes it necessary to ... renewable energy planning is discussed in the literature [6, 10-14]. In a previous analysis by Pohekar et al., multi-attribute utility theory (MAUT) was the most

This study conducts a systematic literature review and a meticulous bibliometric analysis that examines 128 scientific papers from 2010 to 2023 on green finance and renewable energy development to address the urgent need for sustainable solutions in the fight against climate change.

A review of renewable energy sources, sustainability issues and climate change mitigation. Cogent. Eng. 3, ... a review of the empirical literature. Energy Econ. 46, 522-530 (2014).

Renewable energy is considered to be the most important component of clean energy, and the use of renewable energy can minimize the impact on the environment, ... The section 2 is literature review and theoretical hypothesis. The section 3 is the data source, indicator description and typical facts. ...

Energy resource has been the fundamental element for an economy or economic development (Xiong et al., 2014) is clear that economic growth mainly depends on energy consumption, which is highly responsible ...

The global proliferation of renewable energy has been fueled by a combination of factors, spearheaded by proactive government policies. These include the implementation of renewable portfolio standards, the provision of feed-in tariffs, auction mechanisms, and the availability of tax credits [6] ch policies, along with dedicated initiatives to foster research ...

literature review on articles discussing the conditions of deployment of renewable energy resources in Africa, with the goal to understand the latest research trends, questions and issues on this topic. Our search period is limited to 2013-early 2018. ... renewable energy investors are rare in Africa and where they do, interest rates are so ...

Renewable energy applications such as solar hot water systems, solar PV system, and ground source heat pump were used as energy supply systems. ... A methodological framework that includes a comprehensive literature review and a questionnaire survey was created for international green building experts to identify and have a deeper understanding ...

A Review of Renewable Energy Supply and Energy Efficiency Technologies, IZA Discussion Papers, No. 8145, Bonn Institute for the Study ... Jenniches S. (2018). Assessing the regional economic impacts of renewable energy sources - a literature review. Renewable Sustain. Energy Rev. 93, 35-51. doi: 10.1016/j.rser.2018.05.008. CrossRef Full Text

Campos-Guzmán et al. (2019) conduct a comprehensive literature review of the sustainability

assessment method of renewable energy system over the past decade (2007-2017), which suggest that a methodological framework combining LCA and MCDM is the appropriate method for the sustainability assessment of renewable energy system.

This review has discussed the environmental impacts (EIs) of wind, water-based energy systems (mainly hydropower), bioenergy, and geothermal energy systems. The focus ...

Renewable energy literature review bibliometric analysis forecasting. 1. Introduction1.1. Importance and challenges of renewable energy. As the most promising alternatives to fossil fuels, renewable energy, including wind energy (Zucатели et al., 2021; Zhu et al., 2019), solar energy (Zhou et al., 2021, Zhou et al., 2021), ocean energy ...

This article presents a systematic literature review of the impact of renewable energy development on the environmental and nature conservation in Southeast Asia. Based on a review of 132 papers and reports, this article finds that the most reported negative impact of renewable energy development comes from hydropower, biofuel production, and ...

Dive into the research topics of "Community Engagement and Equity in Renewable Energy Projects: A Literature Review". Together they form a unique fingerprint. Literature Reviews Social Sciences 100%

Energy resource has been the fundamental element for an economy or economic development (Xiong et al., 2014) is clear that economic growth mainly depends on energy consumption, which is highly responsible for greenhouse gas (GHG) emissions, particularly CO₂, as stated by Gabr and Mohamed (2020) 2 emissions are a by-product generated by ...

Reducing fossil fuel consumption in the global market, particularly expanding renewable generation, has been a great challenge for the energy community [6].Renewable sources come in various forms such as sunlight, wind, rain, tides of ocean, biomass, and geothermal, which can be replenished naturally [7].Renewable energies are a form of energy ...

Machine Learning Techniques for Renewable Energy Forecasting: A Comprehensive Review [11] 2023: J. Clean. Prod. Deep learning for renewable energy forecasting: A taxonomy, and systematic literature review [13] 2023: Sustainability: Forecasting Renewable Energy Generation with Machine Learning and Deep Learning: Current Advances ...

A review of hybrid renewable energy systems: Solar and wind-powered solutions: Challenges, opportunities, and policy implications. ... Table 6 presents a summary of recent literature that has investigated the combination of PV and wind WT technologies in various aspects. These studies explore the integration of PV and WT systems to harness ...

Renewable energy (RE) appears to be a mean to decarbonize economies. To fight global warming, which

might have substantial impacts on ecosystems and economies, it is essential to understand the empirical determinants of RE deployment for public policy guidance and to foster future research. ... The systematic literature review methodology was ...

A review of renewable energy sources, sustainability issues and climate change mitigation. Cogent Eng, 3 (1) ... Assessing the regional economic impacts of renewable energy sources - a literature review. Renew Sustain Energy Rev, 93 (2018), pp. 35-51, 10.1016/j.rser.2018.05.008. View PDF View article View in Scopus Google Scholar

This review revealed that the selection of input and output factors used in DEA is sufficient enough to evaluate renewable energy performance. This review contributed to the current energy literature and filled in the gap with the addition of new knowledge on assessing renewable energy research studies intensively using a formal systematic ...

Among various renewable energy technologies, solar power generation is the most common and well-known technology and has been actively applied worldwide (Rezk et al., 2019; Iqbal et al., 2021). Other than solar energy systems, renewable energy resources like wind, geothermal, and biomass energy systems have been getting good attention and promising ...
