

Replace roof with solar panels

How much does it cost to install solar panels on a roof?

The cost of a dual installation of solar panels and a roof is a large purchase for most homeowners. According to the National Renewable Energy Laboratory (NREL), the average installation cost for a residential rooftop solar array alone is \$19,000. If the solar array is installed simultaneously with a new roof, the average is \$25,000.

Should you choose solar during a roof replacement?

That isn't the only way you'll save by choosing solar during a roof replacement. Solar panels last about 25-30 years, which is similar to the lifetime of a roof. By doing both at the same time, you avoid needing to have your solar panels re-installed after replacing your roof, which can save money in the long-run.

Should you add solar to your roof?

If you're thinking about replacing your roof--like millions of other homeowners every year in America--you may also be considering adding solar at the same time. In fact, an average of 2.3 million single-family, detached homes per year will require a roof replacement over the next decade.

Should you get a free roof replacement with solar panels?

It's important to address the notion of free roof replacement with solar panels. A small number of companies may advertise free or no-cost roof replacements with solar panels thanks to partnerships with roofing companies. However, it's important to do your research when considering any such offer.

Do solar panels need to be reinstalled after a roof replacement?

Whether you are planning on leasing the solar panels or buying them outright, there is always a fee that is involved in having the solar panels removed and reinstalled after a roof replacement.

Can you install solar panels and a new roof at the same time?

When you install solar panels and a new roof at the same time, it's very unlikely you'll need to re-roof during your system's lifetime. Solar panels are more durable than most roofing materials and can extend the life of the roof shingles they cover. Replacing your roof and installing solar panels will probably cost about \$30,000.

Removing and reinstalling solar panels for roof replacement will cost between \$1000 and \$6500, depending on the size of your roof, how many panels you have, and many other factors. On a 6'x10' grid, where one cell ...
