Seagate backup power cord

If possible, try using a different cable. Try using the drive on a different computer. Verify the drive light is on. Desktop Drives typically require a power adapter. No light could indicate the power adapter is not connected to power. Try a different power outlet. (Desktop Drives)

See here a drawing of the back of a SATA hard drive, with the data cable and the power cable connecting into it. Some SATA drives include a small power adapter that plugs in to the normal power cable inside an older PC or Mac so that it will fit the SATA drive. (Click to expand) See here an image of that power cable adapter.
