Small uninterruptible power supply for power outage, compatible with router, modem, security camera, smartphone, fax machine, fingerprint recorder, DSL, ect, and can still use the network ...

While some security cameras come with built-in battery power backup, it is not enough to last a prolonged outage or potential sabotage. This blog talks about Uninterrupted Power Source (UPS) power backup systems that provide long-term backup for security cameras.

Battery backup devices have varying degrees of backup ability. To determine how powerful a UPS you need, first, use the OuterVision Power Supply Calculator to calculate your computer's wattage requirements. Take this number and add it to the wattage requirements for other devices you'll plug into the battery backup.

This is an uninterrupted power supply (UPS) intended for use with security camera systems to supply short amounts of backup time in case of an electrical outage. Please make sure you are not connecting any other devices besides your DVR, and camera power supplies, as any other electrical devices connected to the battery will shorten the ...
