

# Sell solar energy surplus to electric company in florida

Can I sell surplus solar energy to a local Electric Company?

In other words, you can sell surplus solar energy to the local electric company. Net metering is also known as solar buyback, net billing and net energy metering (NEM). Depending on your location, net metering may be available for other renewable energy systems other than solar photovoltaic (PV) panels.

Why do utility companies sell solar power back to the grid?

Utility Company Competition: When you sell solar power back to the grid, you contribute to a more competitive energy market. Utility companies are now incentivized to offer better service and potentially lower rates because they are competing with solar energy systems and other renewable energy source providers.

How much can you earn selling energy back to the grid?

How much you can earn by selling energy back to the grid depends on a few key factors: your energy usage, how many kilowatt-hours (kWh) your solar system generates, and the incentives offered by your state and utility company. Here's a deeper look:

Can you sell excess solar power?

Selling excess power from your solar system can lead to significant savings and even profits over time. The earning potential depends on factors like your location, the size of your solar panels installed, and your local net metering policies.

Do net metering and solar buyback programs offer credit?

Most net metering and solar buyback programs do not issue credit at the full retail rate of electricity. For example, a homeowner typically charged 16 cents per kWh may receive a net metering compensation tariff of only 10 cents per kWh. As mentioned above, net metering policies vary by state and utility company.

Do utility companies pay for excess solar energy?

The short answer is--yes, many utility companies do pay for excess solar energy. However, the details vary depending on where you live and which utility company serves your area.

Limits on Selling Solar Energy. ... There are very few states in which surplus solar energy sales can exceed a consumer's average usage.
