

Seoul industrial park energy storage factory

What is Gyeongsan substation - battery energy storage system?

The Gyeongsan Substation - Battery Energy Storage System is a 48,000kW lithium-ion battery energy storage project located in Jillyang-eup, North Gyeongsang, South Korea. The rated storage capacity of the project is 12,000kWh. The electro-chemical battery storage project uses lithium-ion battery storage technology.

What is Nongong substation energy storage system?

The Nongong Substation Energy Storage System is a 36,000kW lithium-ion battery energy storage project located in Dalsung, Daegu, South Korea. The rated storage capacity of the project is 9,000kWh. The electro-chemical battery storage project uses lithium-ion battery storage technology.

Where is Korea's oldest oil refinery?

ULSAN- Twisted oil pipelines longer than the distance between the Earth and the Moon are coiled up inside Korea's oldest refinery that sits on an 8-million-square-meter industrial complex in this southeastern port city. Rusty steel frames and worn-out factory buildings attest to the age of the industrial complex dating back six decades.

Can SK Group produce carbon-free energy based on energy storage systems?

SK Group Chairman Chey Tae-won, who visited the complex in March, also emphasized that it has the ability to produce carbon-free energy based on electricity, hydrogen and energy storage systems (ESS). "It will create more opportunities," the chairman said at that time.
