

# Solar backup power supply for home

What is a solar backup generator?

Solar backup generators provide a portable solar power supply. Instead of having a permanent solar installation in your home, complete with roof panels and a large battery bank, a solar generator packages everything in one relatively small unit. Solar panels to capture sunlight. These may or may not be included with the main unit.

Do solar panels provide a free supply of backup power?

With a handful of well-placed solar panels, you can provide a FREE supply of backup power for your home. Today, solar home backup power is within reach of everyone. Over the past few decades, the steady march of technology has extended battery life and made solar panels less expensive and more efficient.

Should you use a solar generator for home backup?

The biggest downside of using a solar generator for home backup is that you are limited in storage capacity. Unlike a wired solar system, you cannot create a large battery bank that stores enough power to last days. Most solar generators have smaller lithium batteries that are good for a few hours to a couple of days.

What is a good battery backup system?

Tesla Powerwall+ A well-rounded and expandable home battery backup  
EcoFlow DPU + Smart Home Panel 2 A portable battery that can function as your whole-home backup solution
