What is a solar power meter?

A solar power meter is used pre-construction to ascertain how much UV light reaches a surface (irradiance). In turn, irradiance helps in projecting how much power the PV cells of a solar panel system can generate from the sun in that specific area. A solar power meter may be installed beside PV panels in the post-construction stage.

How to choose a solar power meter?

When choosing solar power meters, the measuring range is vital. The higher the range, the higher the solar radiant flux you can measure in the meter. Apart from that, the units of measurement are also vital. While some products allow measurement in two units [ $\text{W/m}^2$  BTU/(ft<sup>2</sup>·h)], some allow measurements in just one unit.

What is the best solar power meter?

We went with Tenmars Handheld as our best solar power meter. It offers a longer battery lifespan, portability, a big screen, a broad measuring range, a fair price, decent precision, and memory function. In other words, it offers many of the best features of solar meters.

Which digital solar power meter is the least expensive?

The Tenmars Handheld Digital Meter is the least expensive compared to the others. Next to it is General Tools DBTU1300 Digital Solar BTU Power Meter. Beyond the above, the Tenmars Handheld Digital Meter has a measuring range of up to  $2000 \text{ W/m}^2$  and  $634 \text{ BTU/(ft}^2\text{·h)}$ . Its resolution is  $0.1 \text{ W/m}^2$  and  $0.1 \text{ BTU/(ft}^2\text{·h)}$ .

What is the largest solar power meter?

The Tenmars Handheld Digital Meter displays the largest solar power meter on the list. Plus, it has a green LCD screen. So, even in the brightly lit conditions outdoors, you will not have too much trouble reading the screen. No other solar power meter on the list has such a feature. The Tenmars Handheld Digital Meter uses a 9-volt battery.

How long does a solar power meter last?

Solar meters would typically not consume so much power. So, the battery can last quite a long. Nonetheless, some batteries last longer than others. Generally, products that use 4 AAA (about 6 volts) last 100 hours, but those that use the 9-volt battery last longer. We went with Tenmars Handheld as our best solar power meter.

Why Your Utility Meter Should Also be a Net Meter or Smart Meter. Most solar systems are not independent of the utility grid. These systems are called grid-tied systems, and combine the cost-saving, energy-independence elements of off-grid solar power with the easily accessed electricity from the power grid.. You can offset 100% of your usage with a grid-tied solar system.

The existing energy meter in our building or home will need to be replaced by a two-way (bidirectional) meter. This bidirectional energy meter or Net Meter is essential as it can measure both, energy import (from the grid to the Customer) and energy export (from the customer to the grid) separately.
