One state in the Mid-Atlantic stands out for its efforts in making solar installation possible for non-profits -- New York.

Who will receive a \$7 billion solar grant?

Washington - Today, April 22, as the Biden-Harris Administration celebrates Earth Day, the U.S. Environmental Protection Agency announced 60 selectees that will receive \$7 billion in grant awards through the Solar for All grant competition to deliver residential solar projects to over 900,000 households nationwide.

What is the \$7 billion solar for all program?

Oops, something went wrong. Check your browser's developer console for more details. Under the \$7 billion Solar for All program, the 60 grant recipients will create new or expand existing low-income solar programs, which will enable over 900,000 households in low-income and disadvantaged communities to benefit from distributed solar energy.

Should nonprofits invest in solar power?

Before the Inflation Reduction Act, third-party ownership was a popular choice for many nonprofits because they couldn't take advantage of tax-saving incentives. Solar leases and power purchase agreements (PPA) often offer no-money-down options, though some require an upfront investment.

Are nonprofits eligible for solar incentives?

In the past, nonprofit organizations weren't eligible for one of the most significant solar incentives because they didn't have the tax liability required to qualify. However, 2022's Inflation Reduction Act changed that. In addition to this 30% discount, other non-profit solar incentives and financing options are available.

Can a non-profit install solar energy in New York?

One state in the Mid-Atlantic stands out for its efforts in making solar installation possible for non-profits-- New York.
