

Solar power purchase agreement vs lease

What is a solar lease & Power Purchase Agreement (PPA)?

Solar leases and power purchase agreements (PPAs) are two popular options used to pay for rooftop solar energy systems. Both allow you to go solar without the upfront costs of purchasing a system outright. However, they differ in structure, benefits, and long-term implications. What is a power purchase agreement (PPA)?

What is the difference between a solar lease and a power purchase?

The difference is in the monthly payment. If you can't afford to buy solar panels, a solar lease or power purchase agreement might help. Buying a solar energy system is considerably cheaper today than it used to be, but it's definitely still a huge purchase. Thankfully, there are ways to get solar power without the huge up-front cost.

Are solar PPAs & leases the same?

Solar PPAs (Power Purchase Agreements) and leases are extremely similar financing options. The main difference lies in what you pay for: with a PPA, you pay for the solar power generated from the system, while with a lease, you pay for the solar system itself. Both options have their pros: No upfront costs. No maintenance costs. Limited risk.

What is the difference between a power purchase agreement and a lease?

Learn the differences and make an informed choice on your path to sustainability. Power Purchase Agreements (PPAs) offer variable payments based on energy production. Leases provide stable, fixed monthly payments for solar users. Consult a tax professional, financial advisor, or solar energy consultant for personalized insights.

How long does a solar PPA lease last?

A solar lease term can last anywhere from 2 to 20 years. A solar PPA (Power Purchase Agreement) and a solar lease are similar, so they are sometimes mistaken for the same thing. With both a solar PPA and a solar lease, you won't have to deal with any upfront costs since you won't be buying the solar panels.

Should you lease or buy solar panels?

According to Garrett Mendelsohn, CEO of Solar Bootcamp, one big advantage of both leases and power purchase agreements is that many will replace equipment during the contract period when it comes to the end of its lifetime. Can solar panels save you money? Interested in understanding the impact solar can have on your home?
