

Solar system cover photo

What is a solar cover?

The covering on the sunny side of a photovoltaic (PV) module, providing protection for the PV materials from impact and environmental degradation while allowing maximum transmission of the appropriate wavelengths of the solar spectrum. To arrange in parallel layers or strata.

Where can I find high-resolution images of the Solar System?

Explore NASA's media galleries to view and download high-resolution images of the solar system, agency missions, and more. Discover the cosmos! Each day a different image or photograph of our fascinating universe is featured, along with a brief explanation written by a professional astronomer.

How does a solar cover work?

If you look closely at a solar cover, you will notice that it's covered with tiny bubbles. These bubbles work by trapping heat from the sun's rays. It is this very heat that is responsible for the warming up of your pool's water. Solar cover bubbles up or down? Solar covers are always placed with the bubble side down.

Which solar cover should I buy?

If you want my quick answer, I think the Sun2Solar Blue Square Solar Cover would be the right fit for most people, however, the Blue Wave Solar Blanket is my close second. If you want great value for a killer price, I would recommend the Blue Wave all the way. To find out more, check out my top picks below!
