What is a solar lease agreement?

A solar lease agreement is a document you use to lease out solar power and equipment to another party. This template lets you create a residential or commercial solar lease agreement for either the buyer/client or the Power Provider/developer. However, generally, the developer provides it, and it helps ensure financial certainty for both parties.

How do a power purchase agreement and a solar lease stack up?

Head-to-head, here is how a power purchase agreement and a solar lease stack up against one another financially. Most solar PPAs and leases are signed with zero upfront costs, meaning that the solar company will design and install your system without any out-of-pocket expenses.

What is the difference between a solar lease and a power purchase?

The difference is in the monthly payment. If you can't afford to buy solar panels, a solar lease or power purchase agreement might help. Buying a solar energy system is considerably cheaper today than it used to be, but it's definitely still a huge purchase. Thankfully, there are ways to get solar power without the huge up-front cost.

How does a solar lease work?

Under a solar lease, this third-party owner (e.g., a solar company) installs solar panels on your property and then sells you the electricity produced at a predetermined monthly rate. Companies calculate this rate based on the estimated annual production of your solar system and include this rate in your contract.

What are the advantages of a solar lease?

The three main advantages of a solar lease are: Saving money on electricity: With a solar lease, you'll save on electricity costs throughout your agreement. Low or no upfront costs: Unlike a cash purchase, solar leasing setups allow you to go solar without paying much (if any) money upfront.

How much does a solar lease cost?

There are two types of solar leases: In a fixed monthly lease, you pay a flat fee every month. For example, if your average utility bill is \$150, a solar lease company may offer you flat payment of \$100 per month. In a PPA, you pay for the electricity generated by the leased system, which will vary from month to month.

A solar lease allows customers to avoid the upfront costs of solar equipment and installation. Instead of paying for a solar system outright, the customer can pay a fixed monthly amount for...
