Who is solid power?

From the outside, Solid Power is an industry-leading developer of all-solid-state battery cells. From the inside, we are a collection of individuals with a shared passion and purpose in revolutionizing energy storage and enabling future e-mobility.

Who owns solid power batteries?

Press Contact. Author. ### Start of joint Press Release from all partners involved ## Louisville, Colorado, USA. Solid Power, an industry-leading producer of all solid-state batteries for electric vehicles, today announced a \$130 million Series B investment round led by the BMW Group, Ford Motor Company and Volta Energy Technologies.

What does solid power's partnership with BMW & Ford mean for EVs?

The company's partnership with BMW and Ford will further accelerate the full commercialization of Solid Power's batteries and position both car companies to be among the first to have EVs on the road powered by safer, affordable, high-energy solid-state batteries." # end of joint Press Release from all partners involved ###

Why should you choose solid power?

Solid Power's sulfide-based solid electrolyte and silicon-based anode chemistry demonstrates impressive battery improvements and performance, including: increased range, lower cost, more vehicle interior space and better value and greater safety for our customers.

Can solid power power electric vehicles?

Solid Power has demonstrated its ability to produce and scale batteries that are designed to power longer-range, lower cost and more competitive electric vehicles using existing lithium-ion battery manufacturing infrastructure.

What type of batteries does solid power produce?

Solid Power is currently producing 20 ampere hour (Ah) multi-layer all solid-state batteries on the company's continuous roll-to-roll production line, which exclusively utilizes industry standard lithium-ion production processes and equipment.

A few months ago, SolidPower received strategically important funding of 40 million euros. In the first investment step, production capacities in Italy will be expanded. SolidPower is also investing in further research into solid oxide fuel cell (SOFC) technology. In total, SolidPower will create around 80 new jobs in Italy by 2020.

RM ITALY BLA600 Solid State Amplifiers are 500W sold-state wideband, compact, automatic linear amplifiers for 160 through 6 meters; 1.8 to 54 MHz. Low input drive requirements (20 to 25W on 80-10 meters, 30-40W for 500W on 160m and 6m). They utilize the rugged NXP / Freescale MRF6VP5600H 50V power MOSFET for high power and high reliability.

Solid flexibility. The key advantage of SOFC (Solid Oxide Fuel Cell) is to convert various types of gas into

electricity and heat. This guarantees fully reliable and continuous energy supply, especially with volatile renewable sources.
