

Solid power usa

Who is solid power?

From the outside, Solid Power is an industry-leading developer of all-solid-state battery cells. From the inside, we are a collection of individuals with a shared passion and purpose in revolutionizing energy storage and enabling future e-mobility.

Who owns solid power?

The company was initially funded by prominent investors including Hyundai, Volta Energy Technologies, Umicore, Sanoh, A123 Systems and Solvay. From the outside, Solid Power is an industry-leading developer of all-solid-state battery cells.

Is solid power a solid-state battery company?

Solid Power's leadership in all solid-state battery development and manufacturing has been confirmed with the delivery of hundreds of production line-produced battery cells that were validated by Ford and the BMW Group late last year, formalizing Solid Power's commercialization plans with its two long-standing automotive partners.

Who makes solid power batteries?

Solid Power is an industry-leading producer of all solid-state rechargeable batteries for electric vehicles and mobile power markets. Solid Power replaces the flammable liquid electrolyte in a conventional lithium-ion battery with a proprietary sulfide solid electrolyte.

What does solid power do?

Solid Power has demonstrated its ability to produce and scale next-generation all solid-state batteries that are designed to power longer range, lower cost and safer electric vehicles using existing lithium-ion battery manufacturing infrastructure.

What is a solid power battery?

As a result, Solid Power's all-solid-state batteries are designed to be safer, more stable at high temperatures, offer higher energy and provide a lower cost alternative to today's best available lithium-ion batteries, all while being produced with traditional lithium-ion manufacturing processes. There are no events scheduled.
