Minister Peter Marcello and state-owned electric producer, Ethiopian Electric Power, the two countries formally targeted regional energy cooperation, with specifics outlined in a Memorandum of Understanding (MoU). ... The technical storage or ...

The discovery of oil, mainly in South Sudan in 1998, hindered the further exploitation of solar energy as a means of producing energy on a wider scale as Sudan became heavily reliant on its oil resources in the South. In 2011, a referendum paved the way for South Sudan to declare its independence as a separate state.

Having recognised solar energy potential, South Sudan is expected to put more emphasis on development of solar energy sector as part of its fight against energy poverty and economic diversification. The good news is that South Sudan has already started its fight against energy poverty and one evidence for that is the ongoing construction of ...

In South Sudan, 96% of the families use biomass (firewood and charcoal) for their energy needs. Of this, 81.4% use firewood while about 14% use charcoal (NBS, 2012). This contributes to ...

Solar energy is abundant during the dry season in South Sudan. Because of this, the sun's energy is harnessed using solar technologies to pump water into the elevated water storage tank. Gravity allows the water to flow through underground pipes directly to ...

Trinity Energy, the oil marketer in South Sudan, is setting its sights on regional growth and domestic refining, according to deputy CEO Kenneth Mugambi. Mugambi cites the launch of the Dangote refinery in Nigeria as an inspiration for the company's push into oil refining, noting that the entry of pan-African financiers such as Afreximbank ...

Carbon Storage. Rather than expelling harmful CO₂ into the environment, it can be stored for future energy use, or stored deep underground in certain geological formations. This ensures the safe sequestration of CO₂ while keeping it out of our environment.

Peacekeeping mission through renewable energy. The UN has had a peacekeeping mission in Sudan since the country's independence in 2011 and the report suggests that one possible solution for the country's electricity sector, is to work "with the energy transition objectives of the United Nations (UN) Secretariat, which present
