

Space order

What is spatial order?

As opposed to chronological order or other methods for data organization, spatial order ignores time and focuses primarily on location (or space, which makes this term easy to remember). A spatial order comes with a set of transitive words and phrases that help writers and speakers navigate a spatially ordered paragraph and distinguish its parts.

What is the difference between Order of importance and spatial order?

Order of importance is most appropriate in a persuasion paper as well as for essays in which you rank things, people, or events by their significance. Spatial order describes things as they are arranged in space and is best for helping readers visualize something as you want them to see it; it creates a dominant impression.
