

Sunpower inc

The CT Cooler was brought to commercialization in 2001 after 10 years of cryocooler development at Sunpower. The CT stands for CryoTel™, as the first commercial application was for the telecommunications industry. The CT has been used successfully in applications such as High Temperature Superconductivity (HTS) filters, high altitude balloons ...

performance. efficiency. reliability. The GT Cooler was brought to commercialization in 2005. The GT has been used successfully in applications such as High Temperature Superconductivity (HTS) filters, high altitude balloons, refrigeration, germanium detectors, IR detectors, radio telescopes, laser diode cooling, and research among others.

ATHENS, OH, April 18, 2018 -- Sunpower, Inc., the world leader in free-piston Stirling engine and cryocooler technology, announces the development of the DS30 cryocooler as well as the ability for select customers to purchase a DS30 Engineering Build (EB) unit. The DS30 cryocooler is a welcome option for many applications that need reliable ...

Customers affected by SunPower's bankruptcy may lose some of the initial warranty coverage promised but should still be covered by manufacturing warranties. SunPower is still managing its solar lease and PPA systems, but are looking for an Operations and Maintenance partner to complete service requests.
