What type of energy is used in Tuvalu?

o The 3rd highest energy consumption, thermal use (cooking, boiling water for drinking, sanitary hot water), is mainly provided by biomass. Tuvalu's environment is under pressure: sea-...

What are the characteristics of Tuvalu's energy consumption?

Analysis of Tuvalu's energy consumption reveals the following characteristics: o Tuvalu's economy is almost totally dependant on oil. Only around 18% comes from local biomass resources, which is not accounted for in official statistics and is not the object of any active policy.

How does Tuvalu's environment affect development & economy?

Tuvalu's environment is under pressure: sea-water rise contaminating the soil with salt, direct impact on waste and sewage systems from rising human density contributing to further damage. The 1987 UN Brundlandt report has definitely shown the existing link between environment/ecology and development /economy.
