Thanks for sharing that review. I've also been itching to find out how these 1.5v Li-Ion AA rechargeable batteries perform. What I find interesting is the "fan" test in the above video -- apparently, the discharged capacity test may not completely equate to the "fan" runtime -- the Vapcell has the most tested capacity (just a bit more capacity when compared to some of the ...

Are you talking about batteries like Tenavolts, they're a 3.7v lithium cell that is regulated down to a constant 1.5v. I have a couple of sets of them, they work better in high voltage devices (our kitchen sink soap dispenser). It doesn't really need the 1.5v, but the 1.2 reaches cutoff way before the batteries are empty.
