The key consideration for providers stacking merchant markets (wholesale/BM) with services in the Dx suite is to ensure stacking doesn"t compromise their ability to deliver the service. This means maintaining an appropriate state of energy (SoE) and always being capable of delivering 100% of their contracted response volume.

N- and O-mediated anion-selective charging pseudocapacitance originates from inbuilt surface-positive electrostatic potential. The carbon atoms in heptazine adjacent to pyridinic N act as the electron transfer active sites for faradic pseudocapacitance. A free-standing films (FSFs) stacking technique produces current collector-free electrodes with low interfacial ...
