

# Volvo engine system service required loss of power

What does engine system service required mean on a Volvo?

When you see the "Engine System Service Required" message on your Volvo, it's natural to be concerned. This alert indicates there may be an issue with your vehicle's engine system. No need to panic, but it's important to address the problem soon to avoid possible consequences.

What causes a Volvo engine system service required message?

Your Volvo's Engine System Service Required message can be caused by several problems. These problems are crucial to diagnosing the issue with your vehicle. You might come across the following common issues: Sensor malfunctions: Faulty oxygen sensors or mass airflow sensors can trigger the message.

How do you maintain a Volvo engine?

Proper maintenance, including appropriate oil changes and DPF care, will help you keep your Volvo engine system in optimal condition. Not only will this extend the life of your vehicle, but it will also improve fuel efficiency and reduce emissions. How useful was this post?

What should I do if my Volvo has a bad engine?

Use Quality Fuel and Fluids: Fill up your Volvo with high-quality fuel and use the recommended fluids. This can help maintain the engine's performance and reduce the risk of fuel system or engine problems. Address Warning Signs Promptly: If you notice any unusual noises, smells, or warning lights, do not ignore them.

What should I do if my Volvo has a DPF problem?

Use the correct engine oil: Ensure that you always use an engine oil that meets your Volvo's manufacturer specifications to avoid damage to the DPF. Proper maintenance, including appropriate oil changes and DPF care, will help you keep your Volvo engine system in optimal condition.

What if my Volvo engine oil is too low?

If the oil level is too low, you should top it up with the appropriate engine oil for your Volvo. Maintaining proper oil levels helps prevent potential problems and keeps your engine running smoothly. Sometimes, the "Engine System Service Required" message appears due to a faulty sensor.

A few days ago had the engine system service required 1. FAQ; Active Topics; Forum Search; Repair Database Search; Active Topics; Search; VRD Search; Volvo Forum. the car and read the faults stored and let us know what's been detected

Engine Service Required message has just came up on the LCD and I'm wondering what could be the problem. My known issues are: I have the popping noise in the engine and I've tried the same thing as the man on the video and it looks like the hydraulic engine mountings are leaking vacuum (link to video). Recently I've got two codes (P0108 and P0401) in Torque lite ...

Then all of a sudden I lose power, and the "Engine System Service Urgent". I pull over, swear a while and shut the car off for 5 mins. ... Need OEM Volvo Parts? Call Daryl Waltrip Volvo (800) 689-0021 Ask for Jamie or Don. 10-12-2008, 12:29 PM #3. JRL. View Profile View Forum Posts Private Message Senior Member Join Date Apr 2003

I've been getting the message: "Reduced Engine Performance," along with the car going into limp mode. It does not go above about 10-40mph and won't accelerate reasonably. Clearing the codes with my OBDII scanner once I have the key in position II with the car off temporarily solves the issue.

Hi, My wifes 2004 xc90 diesel has recently had power issues. When driving the car suddenly loses power/acceleration. The message "engine system service urgent" pops up. The car still drives but greatly compromised. However if i stop the car and turn off the ignition the message goes away and drives normally.

Believe it or not, one of the most common reasons for a check engine light on your Volvo is simply a loose fuel cap. The cap is important to your car's fuel delivery system, and if it is loose, your car will attempt to warn you about this.

Question - Why do I get an Engine system service required message, code - . Find the answer to this and other Volvo questions on JustAnswer ... Hello :-) I had a the engine light on with service required on my hybrid volvo XC90 - took it to the volvo shop in france, they did a full service and checked for faults. the computer said it was an old ...

We've recently had a service on our 2001 V70, oil, filters, plugs etc... and since then there's a message in the text bit of the dash saying "Engine System Service Required" and the cruise control has stopped working. There was also a "Service Required" light, but i got rid of that with the on/off press trip button thing.

## Volvo engine system service required loss of power

model years 2001-2007 (North American ... The next week I had the PCV system replaced. Check engine light came on soon after and then a day later the Engine System Service Urgent warning. Has been on for 3 days now. Appreciate your ...

Engine system service required I recently had this problem. I noticed that my xc90 warning light came on and the power was greatly compromised, basically un-drivable. I rang volvo and they said bring it in as the car has gone into safe mode restricting power so no damage is caused to the engine, better safe than sorry.

When it detects the DPF needs to be regenerated, (burning off the soot trapped by the filter), the engine management system injects diesel into the exhaust stroke of each cylinder. This burns in the hot exhaust gas, raising temperature of the exhaust to that required for the regeneration process.

Car just popped up a engine system service required. 2005 XC70 Any idea what this is? It's not the maintenance one. ... But I cannot remember ever seeing that caused by oil over filled on a US Volvo. The only system where oil can set codes would be the VVT. ... There are only three wires going to the fan two heavy gauge that I guess are power and ...

I bought a brand new 2022 XC90 extended range back in Apr 2022 at Volvo SF. Today I got the check engine on with "propulsion system service required." Tonight I'm getting notification that the car stopped charging. I'm charging it directly into an 110V outlet without any extension and getting these issues.

Welcome to the forum! Sounds like your V40 is giving you a headache with the "engine system service required" message. Since the oil is overfilled and no obvious issues are showing up, it might be related to the DPF. Getting a second opinion from a Volvo specialist could help. Best to avoid driving until you figure it out. Good luck!

No the engine runs ok, but....when the "engine system service" comes on the engine wont rev above 2000rpm whilst in drive and wont pull. But if in neutral it will rev above 2000. If turned off the problem will disappear for another 10-50 miles?

What to Do When You See the Message. If your Volvo displays the "Engine System Service Required" message, it is important not to ignore it. Continuing to drive the vehicle without addressing the underlying issue can potentially cause further damage and lead to expensive repairs.

The wife complained the XC90 was slow pulling out of drive and had no power. Also Engine System Service Required message up. Checked and very slow pulling off with max speed achievable around 75 (Although at one point on the motorway something appeared to happen and allowed full acceleration past 100) although after I slowed down it wouldn't pull again!
