

Ms. Powell has served as our Chief Executive Officer since August 2021 and as a member of our Board since 2018. From 2008 to 2019, Ms. Powell served as the President and Chief Executive Officer of Green Mountain Power Corporation ("GMP"), an electric services company that serves 75 percent of the State of Vermont's residential and business customers.

Figuring out if your home is good for solar relies on several factors, like where your house is located, the angle of your roof, roof shading, and how old your home is.. In order to understand if your home is suitable for solar, get in touch with one of our Solar Advisors.They'll run a personalized analysis of your home with BrightPath(TM), our proprietary solar design technology.

and organize all of your system data. Our user-friendly interface provides a centraliz...

Many utilities offer a way to sell solar energy back to the grid. This is called net metering. Net metering allows customers to send generated power back to the grid and receive credits they can use toward usage at other times of the day, month, or year.

**Future Ready Equipment. Battery** Think of it like a silent generator. The battery stores excess energy your panels generate that can be tapped into in the event of a blackout. **EV Charging** It can be easy to overlook how much energy bills can jump up when purchasing an electric vehicle. With the right amount of solar power, you don't have to worry about that.

**2024 SUNRUN SIX OFFER. PROGRAM GUIDELINES** Promotion Name: This promotion is called the 2024 Sunrun Six Offer.
