

X dragon solar charger power bank

How much does a X-Dragon solar power bank cost?

Usually priced around \$35, the X-DRAGON 1000mAh offers great value in the world of four-panel solar power banks. There are several other options in the 10000mAh-15000mAh capacity range that are less expensive, but they lack the added benefit of three additional solar panels. They also don't charge as quickly.

Is X Dragon a good solar charger?

Read more: X-Dragon 20W review The X-Dragon 20W is a great value for a 20-watt portable solar panel. The FlexSolar 40W is a high-output model that easily unfolds from the size of a large book into six solar panels. If you're looking for an easy-to-use solar charger setup that doesn't sacrifice wattage, this is our top choice.

How fast does the X-Dragon 10000mAh solar power bank charge?

The X-DRAGON 10000mAh Solar Power Bank contains smart IC chip technology that helps it adjust to whichever device it's powering for maximum charging speed. While the manufacturer claims a 5V/2.1A charging speed, our testing found that it's actually a bit slower than that.

How do I know if my X-Dragon 10000mAh solar power bank is charged?

We found that we had to really press down hard on the flashlight power button to activate it. Out of the box, the X-DRAGON 10000mAh Solar Power Bank was about 25% charged, which we were able to determine by looking at the indicator light panel on the side of the device.

What power bank does the X-Dragon use?

When we used a 10,000mAh Anker power bank to better judge the consistency of the X-Dragon's output voltage, the X-Dragon beat every other model, apart from the Goal Zero Nomad 50, maintaining a nice, solid 5.06 volts (between 4.75 and 5.25 volts is ideal for USB charging, as USB is nominally 5 volts).

Is the X-Dragon 20W a good portable solar charger?

The X-Dragon 20W excelled here, outperforming many of the other portable panels we tested. We tested portable solar chargers in partial sun using a white sheet suspended above every panel to simulate a "cloud" in a repeatable way. We hooked every panel to an identical 10,000 mAh battery and let them charge under the sheet for one hour.

Product Details "Your 100% Satisfaction is our Highest Priority", we will try our best to serve customers well X-DRAGON Solar charger, power your life X-DRAGON is founded by many young people who love modern life and challenge. With X-DRAGON power battery, you DO NOT need to worry your phones without power.
